A94

A94 is an accessible, reliable and efficient cartoner ensuring quiet running at high speed

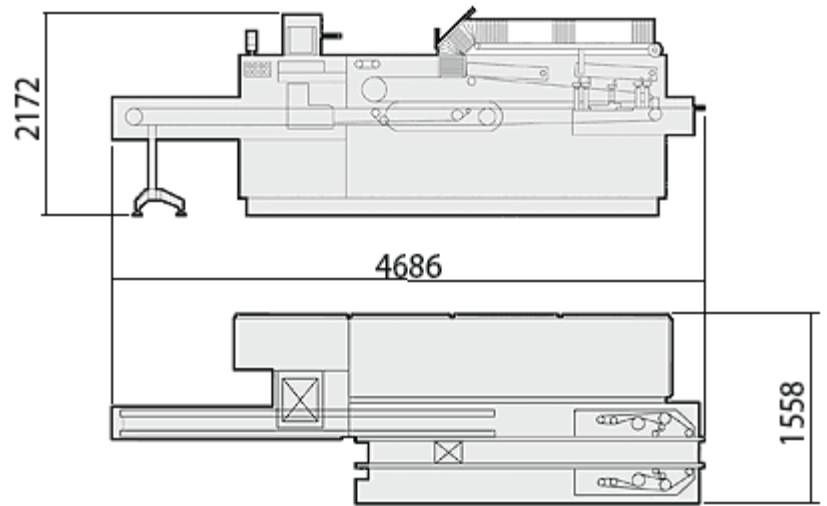

Its design offers a balcony structure allowing fast access and easy cleaning

Its carton prebreaking and opening system combined to extraposition carton handling by multiple belts ensures forming control

The fast reproducible changeover, dependable operation make it the best choice for long runs and multiple shifts. A94 can handle a wide range of product feeding groups (for bottles, squeezable or rigid tubes, blisters, trays, vials, pouches, syringes, spoons, etc) and various tuck closing options (reverse or aeroplane tuck-in, aeroplane flaps or reverse tuck-in flaps with glue dots, tamper evident, complete glue closure).

OPTIONAL UNITS:

- Possibility of feeding leaflets or booklets in various ways (pre-folded, flat or from reel)
- Carton coding on flaps or body, embossing, ink, ink jet, laser, hot foil
- Carton or leaflet barcode reading group
- Product presence verification
- Product insertion inhibiting system in case of faulty components. Products are then conveyed to a box for rejected products
- Link to a Host Computer or printer
- Special paint or stainless steel finishing
- Automatic rejection of incomplete products or cartons or faulty barcode reading
- PLC Siemens or other brand
- Qualification documentation
