

Blister machine UPS 4

The classic among universal blister packaging machines. Twenty-five years ago this was the first system uncompromisingly designed for the pharma industry – today it is the most successful and versatile thermoformer of all times.

- Capable of very great draw depths, large blisters with stiffening ribs and alu/alu blisters
- Superior blister performance with modules of the newest generation
- Intermittent web index with platen sealing, single-stroke- , double-stroke- and multiple-stroke punch
- Two- and three-lane operation up to 50 form cycles and 200 punch cycles
- Machine adjustment at the touch of a button
- Feeding systems for tablets, coated tablets, capsules and special shapes including syringes and ampoules
- Optionally with inspection systems ranging from b/w cameras to contact-free analyses of active ingredients
