

Generator Set Diesel KTA19 Series Engine 409kW - 461kW 50Hz 449kW - 501kW 60Hz

Description

The Cummins Power Generation DF-series commercial generator set is a fully integrated power generation system providing optimum performance, reliability and versatility for stationary standby or prime power applications.

This generator set is designed and manufactured in facilities certified to ISO9001.

This generator set is available with CE Certification.

۲

The Prototype Test Support (PTS) program verifies the performance integrity of the generator set design. Cummins Power Generation products bearing the PTS symbol meet the prototype test requirements of NFPA 110 for Level 1 systems.

Features

• CE Listed Generator Set - The complete generator set assembly is available Listed to CE.

• Exhaust Emissions - Optional Engine certification to U.S. EPA Nonroad Source Emission Standards, CFR 40 on all 60 Hz models.

• Cummins® Heavy-Duty Engine - Rugged 4-cycle industrial diesel delivers reliable power, low emissions and fast response to load changes.

• Permanent Magnet Generator (PMG) - Offers enhanced motor starting and fault clearing short circuit capability.

• Alternator - Several alternator sizes Offer selectable motor starting capability with low reactance 2/3 pitch windings; low waveform distortion with non-linear loads, fault clearing short-circuit capability and class H insulation.

 Control System - The PowerCommand® electronic control is standard equipment and provides total genset system integration, including automatic remote starting/stopping, precise frequency and voltage regulation, alarm and status message display, AmpSentry protection, output metering, auto-shutdown at fault detection and NFPA 110 compliance.

 Cooling System - Provides reliable running at the rated power level, at up to 50°C ambient

• Structural Steel Skid Base - Robust skid base supports the engine, alternator and radiator.

• Warranty and Service - Backed by a comprehensive warranty and worldwide distributor network.

Generator Set Specifications

Governor Regulation Class	ISO8528
Voltage Regulation, No Load to Full Load	± 1%
Random Voltage Variation	± 1%
Frequency Regulation	Isochronous
Random Frequency Variation	± 0.25%
Radio Frequency Emissions Compliance	In compliance with BS 800 and VDE levels G and N.
Radio Frequency Emissions Compliance	In compliance with BS 800 and VDE levels G and N.

Design	4 cycle, in-line, Turbo Charged, Air-cooled
Bore	158.8mm (6.25in.)
Stroke	158.8mm (6.25in.)
Displacement	18.8 litre (1150 in. ³)
Cylinder Block	Cast iron, 6 cylinder
Battery Capacity	610 amps minimum at ambient temperature 32°F (0°C)
Battery Charging Alternator	55 amps
Starting Voltage	24 volt, negative ground
Fuel System	Direct injection
Fuel Filter	Spin on fuel filters with water separator
Air Cleaner Type	Dry replaceable element with restriction indicator
Lube Oil Filter Type(s)	Spin on full flow filter
Standard Cooling System	122°F (50°C) ambient radiator

Alternator Specifications

Design	Brushless single bearing, revolving field			
Stator	2/3 pitch			
Rotor	Single bearing, flexible disc			
Insulation System	Class H			
Standard Temperature Rise	150°C Standby			
Exciter Type	PMG (Permanent Magnet Generator)			
Phase Rotation	A (U), B (V), C (W)			
Alternator Cooling	Direct drive centrifugal blower fan			
AC Waveform Total Harmonic Distortion	No load < 1.5%. Non distorting balanced linear load < 5%			
Telephone Influence Factor (TIF)	<50 per NEMA MG1-22.43			
Telephone Harmonic Factor (THF)	<3%			

Available Voltages

50 Hz Line – Neutral / Line - Line		60 Hz		
		Lir	Line – Neutral / Line - Line	
110/190	240/416	110/190	230/380

230/400		220/380		

Alternator

• Thermistors

• 105°C Temp Rise

Exhaust System

Fuel System

• Industrial silencer

Residential silencer

• Hand fuel transfer pump

Automatic fuel transfer pump

Anti-condensation heater

Note: Consult factory for other voltages.

Generator Set Options

- Engine Compliance - CE Certification (Guarding)
- Heavy duty air cleaner
- Coolant heater and thermostat
- lead acid batteries, cable tray fitted
- NiCad batteries
- Sump drain pump
- Oil and water drain taps
- Tool kit
- Compliance to TA Luft

Cooling

- 50°C ambient radiator
- Remote cooling
- Oil temperature indication

Note: Some options may not be available on all models, consult factory for availability.

• Free standing 450/900/1350L Fuel Tank with

- Fuel tank level switch
- High fuel level warning
- Low fuel level warning
- · Low fuel level shutdown

Generator Set

- Weather protective enclosure
- Silenced enclosure

Warranty

- Warranty 2 Year Extended Prime AppIn
- Warranty 5 Year Extended Standby AppIn
- Sub base tanks

Control System

PowerCommand[™] 3100 - Generator Set Control

Description

The PowerCommand[™] 3100 Control is a microprocessor-based generator set monitoring, and control system. The control provides an operator interface to the genset, digital voltage regulation, digital governing and generator set protective functions.

The PowerCommand[™] 3100 generator set control is suitable for use on a wide range of generator sets in non-paralleling and paralleling applications

The PowerCommand[™] Control can be configured for any frequency, voltage and power connection configuration from 120 to13,800 VAC for for 50Hz or 60Hz operation.

Power for the control is derived from the generator set starting batteries. The control functions over a voltage range from 8VDC to 35VDC.

Major Features

Digital Governing and Voltage Regulation, including digital overcurrent fault regulation. Digital Voltage Regulation with 3-phase sensing AmpSentry[™] Protection for true alternator overcurrent protection. Analog and Digital AC Output Metering. Battery Monitoring System to sense and warn against a weak battery condition. Digital Alarm and Status Message Display Generator set Monitoring: Displays status of all critical engine and alternator generator set functions. Smart Starting Control System: Integrated fuel ramping to limit black smoke and frequency overshoot, Advanced Serviceability using InPower™, a PC-based software service tool.

PowerCommand Network (optional) Provides LonMark interface to external devices

Control System

Includes all functions to locally or remotely start and stop, and protect the generator set. Control Switch - RUN/OFF/AUTO

OFF Mode - the generator set is shut down and cannot be started

RUN mode the generator set will execute its start sequence

AUTO mode, the generator set can be started with a start signal from a remote device

LED Indicating Lamps - includes LED indicating lamps for the following functions: Not-in-Auto mode

Common warning

Shutdown Phase and Scale Indication

Fault Reset Switch. Allows the operator to reset the control after a warning or shutdown condition. Emergency Stop Switch. Immediate shut down of the generator set on operation. Base Engine Protection

Overspeed Shutdown Low Oil Pressure Warning / Shutdown High Engine Temperature Warning / Shutdown Underspeed / Sensor Fail Shutdown Fail to Start / Fail to Crank Low / High Battery Voltage

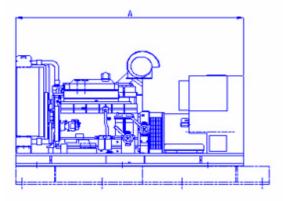

Options

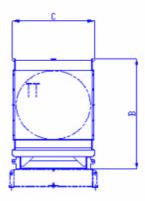

Integrated PowerCommand Digital Paralleling Controls Key Type Mode Selector Switch Exhaust Temperature Monitoring PowerCommand Network Refer to the PowerCommand Controls Technical Bulletin for detailed information (\$1025C-Non-Paralleling / \$1005c-Paralleling)

Ratings Definitions

Standby	Prime (Unlimited Running Time):	Base Load (Continuous):
Applicable for supplying emergency power for the duration of normal power interruption. No sustained overload capability is available for this rating. This rating is applicable to installations served by a reliable normal utility source. This rating is only applicable to variable loads with an average load factor of 80 percent of the standby rating for a maximum of 200 hours of operation per year and a maximum of 25 hours per year at 100% of its standby rating. The standby rating is only applicable to emergency and standby applications where the generator set serves as the back up to the normal utility source. No sustained utility parallel operation is permitted with this rating. (Equivalent to Fuel Stop Power in accordance with ISO3046, AS2789, DIN6271 and BS5514). Nominally Rated.	commercially purchased power. Prime power is the maximum power available at a variable load for an unlimited number of hours. A 10% overload capability is available for limited time. (Equivalent to Prime Power	Applicable for supplying power continuously to a constant load up to the full output rating for unlimited hours. No sustained overload capability is available for this rating. Consult authorized distributor for rating. (Equivalent to Continuous Power in accordance with ISO8528, ISO3046, AS2789, DIN6271, and BS5514). This rating is not applicable to all generator set models.

This outline drawing is to provide representative configuration details for model series only. Do not use for installation design, see respective model data sheet for specific outline drawing number.

Model	Dim "A" mm (in.)	Dim "B" mm (in.)	Dim "C" mm (in.)	Set Weight* Dry kg (lbs)	Set Weight* Wet kg (Ibs)
DFED	3490 (1374)	1830 (720)	1266 (498)	4276	4410
C650D5A	3490 (1374)	1830 (720)	1266 (498)	4276	4410

*Note: Weights represent a set with standard features. See outline drawings for weights of other configurations. Weights are calculated using the largest alternator frame size.

See your distributor for more information.
