Equipment being removed from the GSK RTP Pilot Plant due to the 2015 closure and decommissioning may have been exposed to various proprietary Active Pharmaceutical Ingredients (API) and non-active excipients. However, all equipment has subsequently been comprehensively cleaned and verified in accordance with GSK Standard Operating Procedures. In addition to the clean state of the equipment, GSK also attests to the fact that this equipment has not been exposed to the presence of:

- Penicillins
- Cephalosporins
- Trinems
- Other Beta-Lactams

A handwritten signature in black ink, appearing to read 'Roger Squires'.
