Details

The container filled with raw material will be pneumatically lifted and securely connected with the stirring head. The stirring head unison with the container. Raw material is mixed homogenously during tilting. The container then returns to the starting position.

mixing process has completed.

Feature:

- Mixing dring container tilting
- Multi container set for circular operation
- Easy to change color
- Homogeneous mixing, no solid particles
- High throughput
- Pneumatic positioning, lifting, fastening, releasing and lowering
- Process controlled by PLC
- Easy to clean and maintain
- Safe to operate

Technical Parameters:

Model	Container Capacity(l)	Mixing Motorkw)	Tilting Motor(kw)	Control Type(kw)	Dimension (m x m x m)
ZHJ-600	600	22	1.5	PLC	3.20X1.40X:
ZHJ-1000	1000	30	2.2	PLC	3.20X1.40X:
ZHJ-2000	2000	55	4.0	PLC	3.60X1.60X:
