

Circulation Mills LMZ 2, LMZ 4, LMZ10

System ZETA

The high-speed circulation mill LMZ optimizes the production as far as energy consumption and quality are concerned. With a minimum of control the highest possible reproducibility is guaranteed. The large

dimensioned rotor/slotted pipe separating system allows the use of the smallest grinding media of different materials. The modular system permits the conversion to other NETZSCH grinding systems.

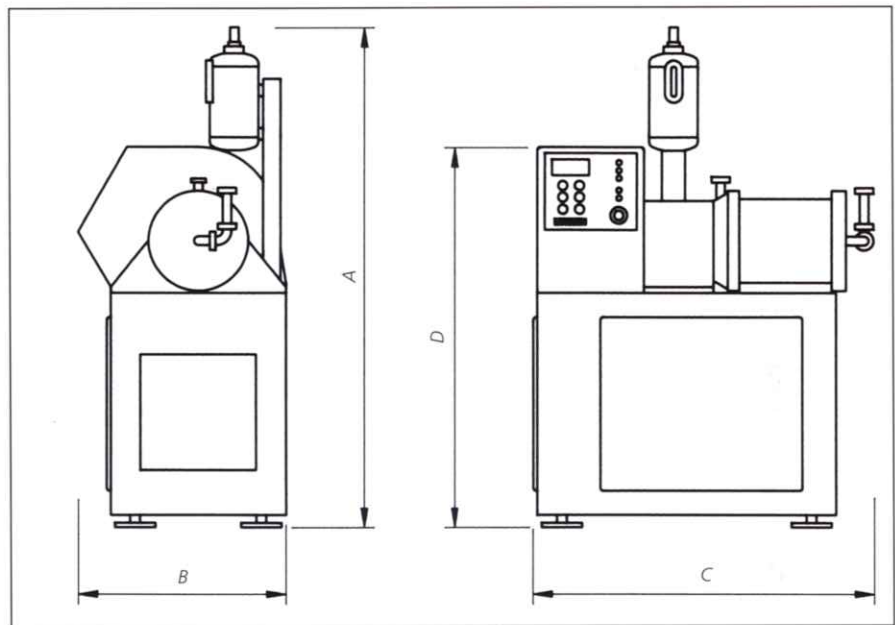

NETZSCH
●●●●●●●●●●

Further advantages:

- designed for high product throughput rates
- easy accessibility of the separating system
- lowest product temperatures due to external cooling

Technical Data

| LMZ | 2 | 4 | 10 |
|---------------------------|-----------|----------|----------|
| Grinding chamber volume l | 1,6 | 4 | 10 |
| Agitator drive kW | 3,6-4 | 13,5-15 | 17,5-22 |
| Agitator speed rpm | 1200-2500 | 600-1800 | 700-1300 |
| Main dimensions mm | | | |
| A | 1400 | 1800 | 1800 |
| B | 620 | 700 | 800 |
| C | 800 | 1130 | 1200 |
| D | 1030 | 1160 | 1230 |
| Weight approx. kg | 280 | 600 | 750 |
