

Atlas Copco

Low pressure oil-free air compressors
ZE/ZA 2-6 (VSD) - 22-500 kW/40-700 hp

Sustainable Productivity

Atlas Copco

Providing continuous productivity at the lowest operational cost

As the cornerstone of many production processes, low pressure compressed air is essential to keep the production going. Atlas Copco's full range of low pressure oil-free air solutions offers a combination of high reliability and energy efficiency, providing a 100% certified supply of oil-free air for a broad spectrum of industrial applications.

Pneumatic Conveying

Exceptional reliability for industrial processing facilities

In activities such as fly ash or cement production, dense phase pneumatic conveying is used to transport goods. A reliable stream of low pressure 100% certified oil-free compressed air is essential to keep the production running smoothly. To maximize productivity in these often harsh and dusty environments, Atlas Copco's reliable ZE/ZA compressors incorporate the latest technologies in the most solid design.

Fermentation

Essential purity for pharmaceutical plants, breweries & chemical plants

Compressed air supplies oxygen to bacteria during fermentation to produce chemicals such as citric acid. The presence of even small oil traces will kill the bacteria and contaminate the end product. As the compressed air comes into direct contact with the process, air purity is vital. Atlas Copco's ZE/ZA oil-free air compressors are certified according to ISO 8573-1 CLASS 0 (2001), which stands for zero risk of contamination, zero risk of damaged or unsafe products and zero risk of losses from operational downtime.

Glass Industry

High efficiency for glass blowing facilities

Mold cooling is one of the steps in the glass blowing process which requires high-quality low pressure oil-free air at the lowest operating cost. Atlas Copco ZE/ZA compressors provide a constant air flow with pressure ratings of up to 4 bar(e). With the promise of low energy consumption and continuous operation, these compressors create opportunities to obtain a competitive advantage.

Flue Gas Desulphurization

Cost efficiency & reliability for coal-fired power plants

In coal-fired power plants, a continuous flow of low pressure air is used to remove sulphur dioxide from the exhaust flue gases. To guarantee uninterrupted pollution control and make sure these plants are up and running 24/7, the used compressed air solution needs to be highly reliable and energy-efficient. Atlas Copco's low pressure ZE/ZA compressors fulfill this demand by offering a constant air flow at minimal energy costs.

Keeping your production up and running

Especially in harsh and dusty environments, a reliable supply of compressed air is critical to ensure production continuity. Every ZE/ZA is designed, manufactured and tested to comply with ISO 9001 stipulations. The totally enclosed IP55 motor is built to ensure continuous operation and exceptional reliability in dusty and humid environments.

Driving down energy costs

Energy costs can amount to 80% of the Life Cycle Costs of a compressor. The generation of compressed air can account for more than 40% of a plant's total electricity costs. Fully compliant with ISO 14001 standards, the ZE/ZA range helps to reduce costs: the EFF1 motor and compression element with Teflon rotor coating and cooling jackets provide the highest air volume at the lowest energy consumption. The integrated Variable Speed Drive (VSD) technology offers approximately 35% extra energy savings by automatically tuning compressor flow to the precise air demand.

Protecting your reputation and production

In virtually any application, oil contamination of the air supply causes serious productivity issues and increases costs. As the first manufacturer to receive ISO 8573-1 CLASS 0 (2001) certification for its oil-free air compressors, Atlas Copco has set a new standard in air purity. Focusing on the protection of critical applications as well as today's increasing quality demands, Atlas Copco offers TÜV-certified 100% oil-free air.

Assuring your peace of mind

Through continuous investment in our competent, committed and efficient service organization, Atlas Copco ensures superior customer value by maximizing productivity. With a presence in over 160 countries, we offer professional and timely service through interaction and involvement. Uptime is guaranteed by dedicated technicians and 24/7 availability.

Easy installation

Delivered ready for use, ZE/ZA compressors come as all-in-one packages including a powerful controller and integrated aftercooler. The compact design eliminates the need for extras and reduces installation to an absolute minimum, saving you time and money. Built for easy integration in your existing compressed air network, the ZE/ZA compressors are up and running in no time.

The preferred choice for total reliability and efficiency

1 State-of-the-art screw compression element

- Unique Teflon coating results in increased efficiency, higher pressures up to 4 bar(e)/58 psig, longer lifetime and protection against corrosion.
- Cooling jackets improve reliability and efficiency by ensuring rotor clearances are always kept to the absolute minimum.
- Efficient shaft sealing eliminates the risk of oil leakage, reduces wear, and guarantees 100% oil-free air.

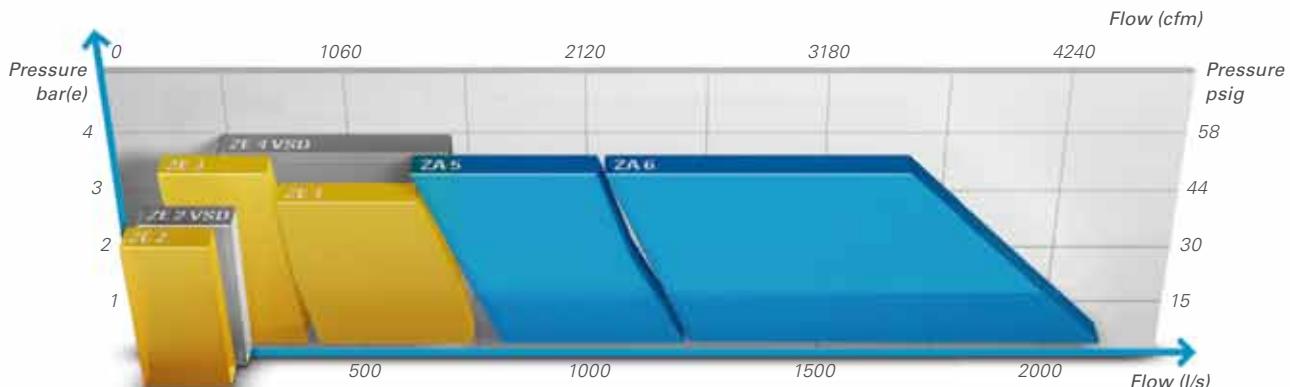

2 Advanced element bearings

- Assuring constant reliability, the element bearings remain stable under varying load conditions.
- Durability is a given: two axial bearings limit internal leakage losses by maintaining small clearances between the rotor surfaces.
- The bearings adapt easily to changing loads, providing the flexibility and efficiency to make production processes run smoothly.

ZE / ZA range overview

3 Control and monitoring

- To keep a firm grip on costs, the advanced Elektronikon® system allows you to monitor overall system performance with service indications, malfunction alarms and safety shutdowns. The multi-language text display is easy to use.
- For extra flexibility, the Elektronikon can be integrated into existing process control systems.
- To increase efficiency and minimize downtime, two control algorithms (*Dynamic Pressure Limit Control* and *Dynamic Speed Limit Control*) tune setpoint pressure and operating speeds to element discharge temperature.

4 High-precision drive system

- Even in dusty and humid environments, the high-efficiency IP55 motor (*efficiency class EFF1*) offers assured operation.
- Transmission losses are low, noise and vibration levels are decreased and element lifetime is prolonged thanks to the AGMA Q13/DIN Class 5 gears in the main drive.
- Since no pulleys are used, the replacement of belts and misalignment of elements is avoided, while mechanical losses are limited.

5 Air-cooled aftercooler (ZE only)

- User-friendliness is increased and costs reduced thanks to easy installation and easy access for cleaning.
- The highly efficient cooling reduces energy consumption and dryer loads.

Water-cooled aftercooler (ZA only)

- Corrosion-resistant stainless steel tubing.
- The risk of leaks is eliminated thanks to highly reliable robot welding.
- Aluminium star insert increases heat transfer.
- Cooling water outside tubes guided by baffles:
 - no dead zones – limited fouling;
 - no degradation in cooler performance;
 - easy cleaning;
 - very long service intervals.

CLASS 0: the industry standard

Oil-free air is used in all kinds of industries where air quality is paramount for the end product and production process. These applications include food and beverage processing, pharmaceutical manufacturing and packaging, chemical and petrochemical processing, semiconductor and electronics manufacturing, the medical sector, automotive paint spraying, textile manufacturing and many more. In these critical environments, contamination by even the smallest quantities of oil can result in costly production downtime and product spoilage.

First in oil-free air technology

Over the past sixty years Atlas Copco has pioneered the development of oil-free air technology, resulting in a range of air compressors and blowers that provide 100% pure, clean air. Through continuous research and development, Atlas Copco achieved a new milestone, setting the standard for air purity as the first manufacturer to be awarded ISO 8573-1 CLASS 0 certification.

Eliminating any risk

As the industry leader committed to meeting the needs of the most demanding customers, Atlas Copco requested the renowned TÜV institute to type-test its range of oil-free compressors and blowers. Using the most rigorous testing methodologies available, all possible oil forms were measured across a range of temperatures and pressures. The TÜV found no traces of oil at all in the output air stream. Thus Atlas Copco is not only the first compressor and blower manufacturer to receive CLASS 0 certification, but also exceeds ISO 8573-1 CLASS 0 specifications.

CLASS	Concentration total oil (aerosol, liquid, vapor) mg/m ³
0	As specified by the equipment user or supplier and more stringent than class 1
1	< 0.01
2	< 0.1
3	< 1
4	< 5

Current ISO 8573-1 (2001) classes (the five main classes and the associated maximum concentration in total oil content).

CLASS 0 means:

- Zero risk of contamination.
- Zero risk of damaged or unsafe products.
- Zero risk of losses from operational downtime.
- Zero risk of damaging your company's hard-won professional reputation.

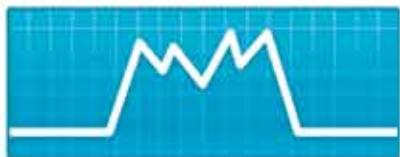

VSD: driving down energy costs

Energy consumption typically represents over 80% of a compressor's and blower's Life Cycle Cost. Looking continuously to innovate and reduce customer costs, Atlas Copco pioneered the Variable Speed Drive technology (VSD) in 1994. VSD stands for major energy savings, while protecting the environment for future generations. Due to our ongoing investments in R&D, Atlas Copco offers the widest range of integrated VSD compressors and blowers on the market.

Varying air demand in 92% of all installations

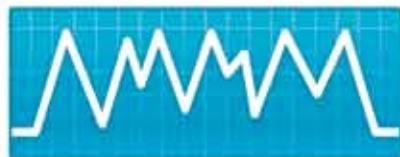

In almost every production environment, air demand fluctuates depending on different factors (*time of the day, week or even month*). Extensive measurements and studies of compressed air demand profiles show that 92% of all compressor and blower installations have substantial variations in air demand. Only 8% of all installations have a more stable air demand. Tests prove that even in this case, VSD compressors and blowers save energy.

Profile 1

- 64% of all installations
- Factory working 24 hrs/day: low demand at night & high demand during the day

Profile 2

- 28% of all installations
- Factory working 2 shifts/day, no weekend work: erratically varying air demand

Profile 3

- 8% of all installations
- Factory working 2 shifts/day, no weekend work: typical 'fixed' speed application

Energy savings of up to 35%

Atlas Copco's VSD technology closely follows the air demand by automatically adjusting the motor speed. This results in large energy savings of up to 35%. The Life Cycle Cost of a compressor and blower can be cut by an average of 22%. In addition, lowered system pressure with VSD minimizes energy use across your production dramatically.

Total compressor and blower Life Cycle Cost

- Energy
- Investment
- Energy savings with VSD
- Maintenance

Find out how much you can save

Atlas Copco can help you map the load/air demand profile of your current compressor and blower installation and indicate potential energy savings with VSD compressors and blowers. **For more information, please contact your local Atlas Copco representative.**

Optimize your system

With the ZE/ZA, Atlas Copco provides an all-in-one standard package incorporating the latest technology in a built-to-last design. To further optimize your ZE/ZA's performance or to simply tailor it to your specific production environment, optional features are available.

Scope of supply

Air circuit

- Air intake filter and silencer
- Flexible air intake
- Full load/no load regulator
- Outlet air silencer
- Discharge expansion joints
- Coated rotors
- AGMA class 13; DIN class 5 gears
- Outlet air flange
- Integral blow-off
- Check valve
- Safety valve

Oil circuit

- Supplied oil-filled
- Completely pre-piped oil circuit
- Built-in oil breather system

Cooling circuit

- Complete water circuit
- Single-point inlet and outlet connections
- Back-flush arrangement for cooler cleaning

Connections

- ANSI flanges
- DIN flanges

Electrical components

- IP55 water and dust-proof TEFC motor
- Pre-mounted electric motor
- Pre-mounted electric cubicle
- Elektronikon® control and monitoring system
- Built-in starter

Framework

- Sound-insulated enclosure
- Base frame with forklift slots

Mechanical approval

- ASME approval
- CE approval

** Medium voltage

Dimensions (L x W x H): 3.90 x 2.35 x 2.75 m

Technical specifications

ZE 2 VSD, ZA 2 VSD & ZE 4 VSD

ZE 2 VSD – 3.5 bar(e)/50.75 psig

		Minimum	Maximum
Free Air Delivery	l/s	87	275
	cfm	183	582
	m³/h	311	989
Shaft power requirement	kW	31.8	92.3
Max. working pressure	bar(e)	3.5	
	psig	50.75	
Unloaded power	kW	12	
Noise level	dB(A)	78	

Dimensions (L x W x H): 2.63 x 1.45 x 2.18 m

ZA 2 VSD – 3.5 bar(e)/50.75 psig

		Minimum	Maximum
Free Air Delivery	l/s	87	270
	cfm	184	572
	m³/h	313	972
Shaft power requirement	kW	31.5	90.2
Max. working pressure	bar(e)	3.5	
	psig	50.75	
Unloaded power	kW	12	
Noise level	dB(A)	78	

Dimensions (L x W x H): 2.63 x 1.45 x 2.18 m

ZE 4 VSD – 2 bar(e)/29 psig

		Minimum	Maximum
Free Air Delivery	l/s	228	855
	cfm	483	1813
	m³/h	821	3078
Shaft power requirement	kW	46.0	159.0
Max. working pressure	bar(e)	2.5	
	psig	36.26	
Unloaded power	kW	21	
Noise level	dB(A)	75	

ZE 4 VSD – 3.5 bar(e)/50.75 psig

		Minimum	Maximum
Free Air Delivery	l/s	218	812
	cfm	462	1721
	m³/h	785	2923
Shaft power requirement	kW	72.0	236.0
Max. working pressure	bar(e)	3.5	
	psig	50.75	
Unloaded power	kW	21	
Noise level	dB(A)	77	

Dimensions (L x W x H): 3.54 x 1.75 x 2.18 m

Driven by innovation

With more than 135 years of innovation and experience, Atlas Copco will deliver the products and services to help maximize your company's efficiency and productivity. As an industry leader, we are dedicated to offering high air quality at the lowest possible cost of ownership. Through continuous innovation, we strive to safeguard your bottom line and bring you peace of mind.

Building on interaction

As part of our long-term relationship with our customers, we have accumulated extensive knowledge of a wide diversity of processes, needs and objectives. This gives us the flexibility to adapt and efficiently produce customized compressed air solutions that meet and exceed your expectations.

A committed business partner

With a presence in over 170 countries, we will deliver high-quality customer service anywhere, anytime. Our highly skilled technicians are available 24/7 and are supported by an efficient logistics organization, ensuring fast delivery of genuine spare parts when you need them. We are committed to providing the best possible know-how and technology to help your company produce, grow, and succeed. With Atlas Copco you can rest assured that your superior productivity is our first concern!
