

N&N Paddlemixer MIX-series

The MIX-Series paddle mixers from N&N Nadratowski are the most universal type of mixers on the market, able to mix most types of products gently, effectively and quickly.

With capacities ranging from 180 to 6000 litres, the possibility of individual configuration and a variety of accessories, you can choose a mixer that perfectly suits your product processes. Havantec's specialists will gladly support you in choosing the right accessories.

The mixing process consists of two interlocking paddle shafts. Mixing takes place by turning both shafts in opposite directions, left or right, at the same preset speed.

The large ejection flap at the bottom of the mixing bowl and a minimum space between the paddles and the bowl (3 mm) ensure a very short ejection time.

The MIX series by N&N

1. Equipped with a clear button control or a user-friendly digital touch screen of the Mitsubishi brand. The software enables manual and automatic operation and up to 100 mixing programmes, where each programme can consist of 5 programmable steps.
2. Equipped with NORD motors
3. Customised work? No problem at all. In consultation with the customer and N&N, the mixer can be designed entirely according to the customer's wishes.

Optionally available with

1. Digital control with the possibility of pre-programming various recipes. This allows you to achieve a constant mixing result.
2. Variable speed. This allows you to achieve an even more precise result with your product.
3. Temperature sensors
4. Water dosing system
5. Easy clean system for easy cleaning of the bowl and paddles
6. Polished bowl for minimum residual product
7. Weighing system
8. Standard truck lift for easy loading with 200 litre standard bins

Are you looking for the right solution within your production process?
Havantec's specialists are happy to think along with you!
