

GREEN VAULT
SYSTEMS

EVERY GRAM. EVERY PACKAGE. EVERY SINGLE TIME.

Simple to use. Easy to clean. Incredibly precise.
Introducing the first packaging and weighing
system designed specifically for the cannabis
industry. One that gives you more control,
consistency, and a better product.

HIGHLIGHT

TECHNOLOGY UNLIKE ANY OTHER. BUILT FOR AN INDUSTRY UNLIKE ANY OTHER.

Instead of repurposing technology from other industries, we engineered our integrated packaging and weighing system for the unique characteristics—and demands—of cannabis. It's built to help grow your business from the ground up.

BENEFITS

You've got production goals to hit, a business to run, and customers to impress. We've got an integrated system that helps you do it all.

Always hit the mark.

Our precision batcher is precise down to 1/100th of a gram and automated for any-sized operation. No more overpacking. No more losing flower. No matter how much you're producing.

Dial it in. As you dial production up.

Produce 800 - 1000 batches per hour, and do it all while cutting down on your labor costs. Our system is designed to simplify your operations and expand alongside your business.

Love at first site. Every single time.

Airkush Technology™ uses gentle puffs of air instead of vibration to move your flower through the machine. The result: a higher-quality, more beautiful, potent flower every single time.

Easy to use. Even easier to clean.

Our processing and weighing equipment is easy to use, customize, and clean. So you spend more time producing and less time on everything else.

MACHINERY

GREEN VAULT PRECISION BATCHER

Our Green Vault System Precision Batcher is designed to offer you the flexibility to switch your packaging options, seamlessly. Or take your automation even further by designing line-specific packaging that includes everything from capping, labeling, and seals. No matter how you work, we can help you build a system around it.

BY THE NUMBERS

YOUR BUSINESS RUNS ON EFFICIENCY AND ACCURACY. OUR TECHNOLOGY DOES, TOO.

Accurate packages an hour	800-1000	
Full ROI when batching 100+ pounds/month	6-12 Months	
Packaging accuracy	0.01 Grams	
Input air	100psi @ 5cfm	
Batch sizes	.5 - 10g	
Power Voltage	110 VAC 1 Phase 10 Amp Available (220 VAC, 1 Phase, 5 Amp)	
Dimensions	High Configuration 42" x 67" x 115" 850 lbs	Low Configuration 121" x 74" 70" 900 lbs.
Materials	304 Stainless Steel PET-G Polyethylene (Low Configuration only)	
Conformity	C-UL 508A GMP Compliant NSF Materials	

WHO WE ARE

The Founders of Green Vault Systems established the company in 2016, bringing together over 65 years of engineering and automation experience to focus solely on solutions that are designed and manufactured specifically for cannabis processing. Our equipment is simple, effective, and has been proven to help companies become more efficient and profitable. And we'd like to help you do the same.

Let's talk.
