

Thiele

Technologies

A Barry-Wehmler Company

Thiele
Technologies

Uniting the brands you know and trust.

Thiele Technologies has united some of the most recognized names in the industry today. From Bemis to Streamfeeder, these are the brands you know and trust. The combined strength of these businesses has allowed Thiele to emerge as one of the largest manufacturers of high-speed integrated packaging machinery solutions in the global marketplace, continuing a tradition of excellence that has endured for more than half a century.

Tisma is Now a Thiele Technologies Product Line

We are proud to announce the acquisition of the Tisma product line as part of Thiele Technologies' acquisition of SWF in February 2007. Tisma Horizon 100 and Victory 100 cartoners are a perfect addition to Thiele Technologies' complete line of automated packaging equipment.

Thiele Technologies now officially builds and supports the vast installed base of Tisma equipment and we are excited to continue the development of this fine line of machinery.

Thiele's 60 years of packaging machinery experience combined with Tisma's cartoning history are teaming up to provide the very best value-priced cartoning products. The legacy of Tisma cartoners will be a key product line of the already extensive Thiele product family.

Solutions For a Variety of Industries...

Beverage

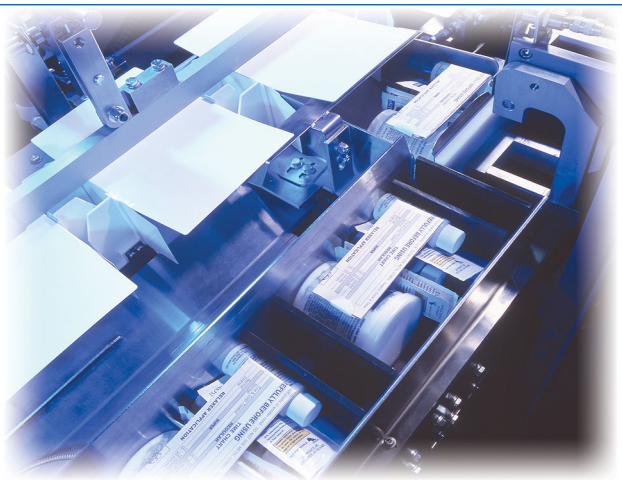

Packaging systems for beverages in cans, bottles or boxes. A full line of packaging machinery serving the beverage and club store industry to enhance production.

Pharmaceutical

Packaging systems for pharmaceutical products requiring high-speed capabilities and flexibility. We offer solutions to complex product handling that require the most strict requirements.

Pet Food

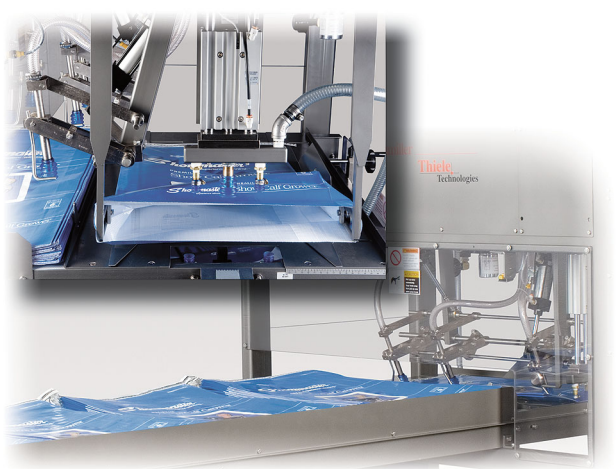

Thiele baggers and palletizers are well proven throughout the Pet Food industry. Whether you're a smaller, custom producer of pet food or a large international producer, you'll find Thiele packaging machinery suits your needs.

Feed & Seed

A wide variety of packaging solutions for animal feed as well as agricultural seeds. Solutions include scales, bagging systems, palletizers, robotics, and more.

Protein

We have a long standing tradition of supplying the world's poultry, meat and fish producers with industry-leading primary and secondary packaging solutions.

Taking the lead in your industry starts with your partnership with Thiele. We make great packaging machinery because we know the industries we supply. Each piece of Thiele Technologies' packaging machinery embodies excellence and innovation in the design and application of packaging equipment technology. So, no matter what product you produce, chances are Thiele Technologies has a machine that can not only package it but add value to it. Our spectrum of systems cater to a wide variety of industries including:

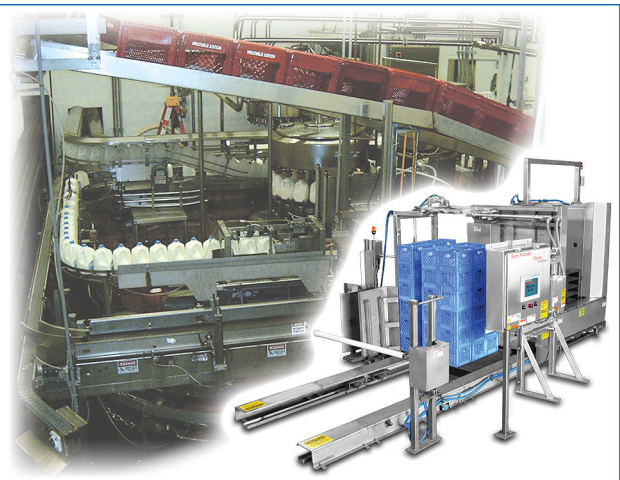

Produce

Simple, yet rugged designs that are easy to operate and easy to maintain. Systems featuring small footprints for easy portability within harsh production environments.

Dairy (Milk)

We have dairy handling equipment in almost every dairy plant in America. A full range of services to the milk industry offering plant layout and equipment design. Complete solutions including conveying, casing, stacking, palletizing, erecting, and shrink wrap bundling.

Dairy (Cultured)

Complete solutions to meet the demands of today's cultured dairy operations. We supply leading dairies with high-quality advanced product handling and packaging capabilities for the toughest applications.

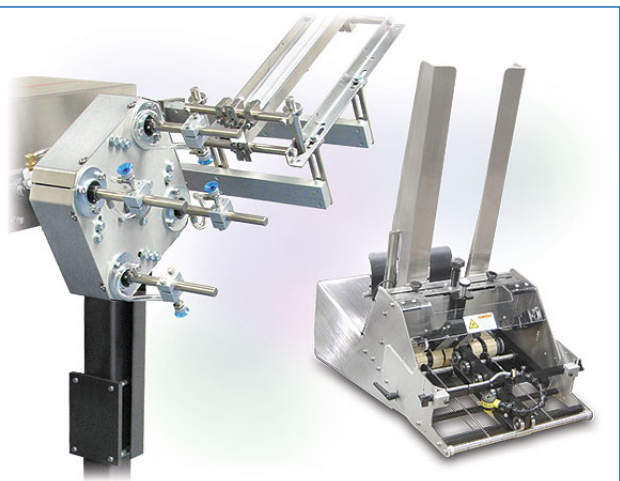

Commercial Printing and Mail Processing

We develop automation solutions for printing and mailing operations looking to increase revenue through non-print services. Innovative systems for collating, batch counting, and kit fulfillment, as well as feeding, dispensing, placing, polybag wrapping and tip-on/affixing.

Contract Fulfillment and Packaging

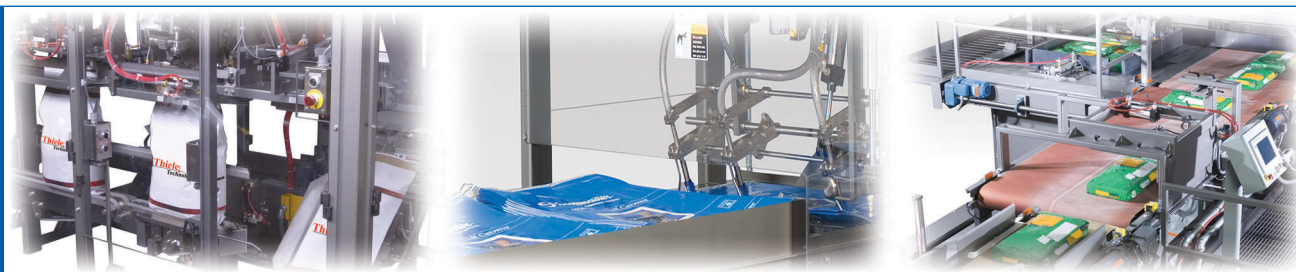

Solutions for contract packagers, fulfillment operations, package inserting, dispensing, pharmaceutical inserting, food packaging, pick and place and rotary placing, as well as complete systems.

Thiele Technologies Packaging Solutions Continue To Be Unsurpassed

Bagging & Palletizing

We offer bagging, bag sealing and palletizing systems that can handle a wide variety of bag types for markets such as pet food and feed & seed.

Dairy Packaging

Our Dairy systems are proven to optimize dairy product handling operations. Services include automatic equipment and conveyors, plant layout design, equipment design, installation and parts.

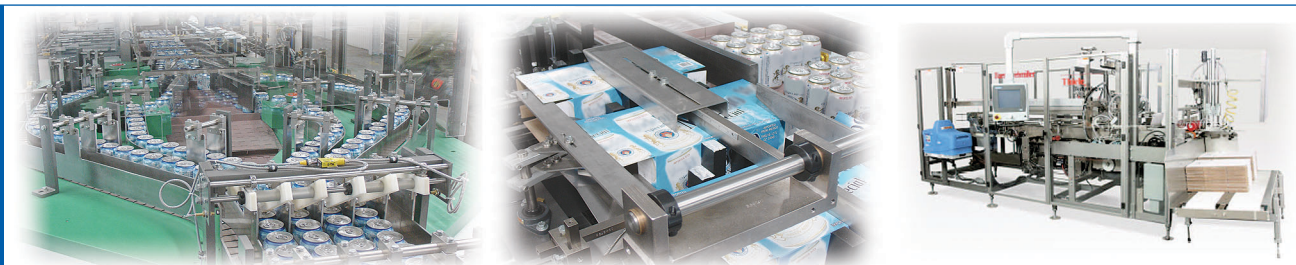

Automation Systems for Print, Mail, Fulfillment

We provide automation solutions for the commercial printing, mail processing, and contract fulfillment & packaging industries.

Cartoning & Case Packing

We offer cartoning and case packing systems for the beverage, pharmaceutical, protein, produce, and dairy industries.

Robotics

Our robotics can be integrated with a number of systems and provide solutions to a wide variety of industries because of their simplicity, flexibility, and high reliability.

Customer Support Services

Thiele Technologies offers experienced and resourceful teams to provide total solutions for every customer, promising superior customer service and support.

These services include customer service, spare parts 24 hours a day, 7 days a week — by phone, fax or through our online portal; emergency field service, equipment installation and preventative maintenance; 24/7 telephone technical support, as well as standard and electronic manuals; available classroom or on-site training; and equipment upgrade and rebuild options to extend the life of your system.

Parts Team

- Parts Hotline available 24/7/365 with support
- Purchase parts online with P.O. or major credit card
- Support for new and used equipment
- Many vendor parts in stock for quick turnaround
- Manufactured parts available for immediate delivery
- Updated spare parts lists available for all machines
- Large inventory of consumable parts
- Same-day shipment of in-stock parts

Service Support Team

- Experienced, factory trained technicians and engineers
- 24/7 telephone technical support
- Emergency field service
- 31 field service technicians throughout the U.S. and Canada
- Installation and start-up services
- Machinery updates
- Available scheduled facility maintenance and inspections
- Available classroom and on-site training
