## Bottom-Belt Driven Case Sealers

- ✓ Heavy-Duty Machinery
- ✓ Fast & Easy Taping Abilities
- ✓ Reliable Every Time
- ✓ Accurate Packaging Systems

### BB Series Case Sealer

*Bottom-belt driven case sealers for taping tops and bottoms of uniform size boxes*

The BB Series of case sealers exemplifies simplicity of design and function. With the smallest footprint in the industry, these highly versatile tapers are available to apply 2" and 3" wide pressure-sensitive tape to tops and bottoms of RSC's.

#### FEATURES

- Plug-in operation
- Fast and easy box size changes
- Adjustable leg extensions
- Heavy-duty 10 guage steel
- Easily interchangeable and removable tape cartridges
- Perfect for ink-jet printers where coding is required at the bottom of the boxes

#### BOX SPECIFICATIONS

	Length	Width	Depth
Minimum Box Size	4.5"	4.5"	3.5"
Maximum Box Size	Inf.	22.5"	25.5"

*Note: High mast available for high boxes.*

### BB/SS Series Stainless Steel Case Sealer

*For taping tops and bottoms of uniform size boxes in wet environments*

The BB/SS Series has the same capabilities as the BB Series above, but is available in stainless steel (including optional stainless steel tapeheads) with NEMA 4 motor and electrics to operate in severe washdown conditions.

### BB/R Series Random Case Sealer

*For taping tops and bottoms of random size boxes*

The BB/R Series random case sealer will adjust automatically to random-sized boxes that are operator-fed. Particularly suited for pick-and-pack distribution centers where several packaging lines merge, this workhorse will stand up to your toughest challenges. Available for 2" and 3" wide tape.

#### FEATURES

- Plug-in operation
- Fast and easy box size changes
- Adjustable leg extensions
- Heavy-duty 10 guage steel
- Can be locked to accept runs of same size cases
- Easily interchangeable and removable tape cartridges

#### BOX SPECIFICATIONS

	Length	Width	Depth
Minimum Box Size	5"	4"	4"
Maximum Box Size	Inf.	20"	21"

*Note: High mast available for high boxes.*

# SB-Series

## Side-Belt Driven Case Sealers

### SB Series Easy-Taper®

*Side-belt driven case sealers for taping tops & bottoms of uniform size boxes*

Particularly useful when boxes are unstable, lightweight, very heavy or void-filled, these units are available to accommodate a wide range of box sizes and seal them with 2" or 3" wide tape.

**The SB Series is the only standard system that will tape tops and bottoms of cases as low as 2"!**

#### BOX SPECIFICATIONS

	Length	Width	Depth
Minimum Box Size	4.5"	4"	2"
Maximum Box Size	Inf.	21"	25.5"

*Note: High mast available for high boxes.*

*Shown with optional infeed pack-table and heavy-duty locking casters.*

### SB/R Series Random Case Sealer

*Side-belt driven case sealer for taping tops & bottoms of random size boxes*

Roller-bed design allows for easy centering of heavy cases. Supplied with solid-state controls, this workhorse will perform under the most demanding conditions. Handles a wide range of box sizes.

Consult factory for box specifications.

*Shown with optional infeed pack-table and heavy-duty locking casters.*

### SB Series Easy Taper/Easy Packer

*Semi-automatic box erecting/case packing system folds & tapes tops & bottoms of uniform size boxes*

The EASY-TAPER/PACKER is a compact case erecting, packing and sealing station. This unit features operator-assisted top and bottom flap folding, which improves operator efficiency.

The EASY-TAPER/PACKER is supplied with extended side belts, flap closing bars and a 48" "anvil" packing station. Sequence of operations is as follows: Operator opens the case and manually folds the bottom front and rear "minor" flaps. Box is placed on the anvil to be filled.

Once filled, the operator pushes down and holds the trailing "minor" flap while presenting the box into the machine. The box is taped with either 2" or 3" wide tape.

#### BOX SPECIFICATIONS

	Length	Width	Depth
Minimum Box Size	4.5"	4.5"	2"
Maximum Box Size	28"	21"	25.5"

*Note: High mast available for high boxes.*

### SB/FC Series Case Sealer

*For taping tops and bottoms of uniform size boxes*

The SB/FC Series of fully-automatic top and bottom case tapers provides full automation. No operator is needed. The SB Series will accept boxes of the same size, fold the top minor and major flaps and apply 2" or 3" wide pressure sensitive tape to both tops and bottoms of RSC's.

All machines are equipped with an infeed indexing gate to separate boxes and can process up to 24 cases per minute. This unit is truly a time and labor-saving piece of equipment.

#### MACHINE SPECIFICATIONS

- Uses pressure-sensitive tape, 2" or 3" wide, up to 15" diameter roll
- Belt speed 72'/minute
- Speed up to 24cs/minute, depending on box size
- Conveyor height adjustable from 22.5" to 30.5"
- Power requirements: 100V/ 4.0A/ 60Hz Air/1 SCFM @ 60 PSI

#### BOX SPECIFICATIONS

	Length	Width	Depth
Minimum Box Size	5"	5"	2"
Maximum Box Size	22"	20"	22"

*Note: High mast available for high boxes.*

# Side-Belt Fully Automatic Hot Melt Gluer

## SB/GT Series Gluer

The SB/GT is a fully-automatic gluer, incorporating a state-of-the-art hot melt glue application system.

The economical unit is shown for top glueing applications, but is available for top and bottom use.

## MACHINE SPECIFICATIONS

- Belt speed 72'/minute
- Speed Up to 24cs/minute, depending on box size
- Conveyor height adjustable from 22.5" to 30.5"
- Power requirements: 220V/ 20A/ 60hz
- Air/1 SCFM @ 60 PSI

## BOX SPECIFICATIONS

	Length	Width	Depth
Minimum Box Size	5"	5"	5"
Maximum Box Size	22"	20"	22"

*Note: High mast available for high boxes.*

## Easy-Taper Tapehead®

The Easy-Taper Tapehead is supplied as standard on all EZ-TEK machines. These heavy-duty tape applying cartridges incorporate bronze bushings and other state-of-the-art materials to provide trouble-free service.

These tapeheads drop into the bottoms of all machines and are loaded and removed in an upward motion from the top taping assemblies.

Both top and bottom tapeheads are identical and can be removed instantly without tools.

***Other tapeheads and tape application systems are available. Consult factory for your needs.***

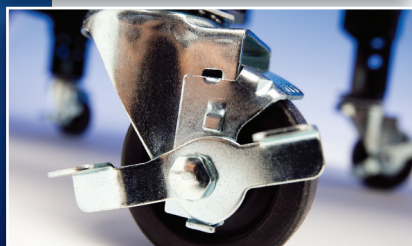

## Front L-Clip Tapehead

This tape-saving tapehead applies a 2"x 2" tape tab to the top or bottom of the front edge of a shipper.

## Edge-Taper® Cartridge

This special system applies tape to two different surfaces. It allows the tape to be applied without extending down the sides.

## Casters

Rugged wheels for transportation within plant. Also available in stainless steel.

## Pack-Table (Basic)

Solid Top 17" x 19" tables for in/out box packaging or staging.

## Top Squeezers (Stainless Steel)

Designed to stabilize the box and push the top flaps together for easier taping. Great for over-filled boxes.

## Pack-Table (Stainless Steel)

Solid Top 17" x 19" tables for in/out box packaging or staging. Stainless steel for easy cleaning or wash-down environments.
