

CVC Vertical Cartoners

The CVC Series of vertical cartoners are designed with today's manufacturing environment in mind. The CVC vertical cartoner is a fully "convertible" machine that offers the ultimate in flexibility with a very large carton size range and a wide array of standard filling options – hand load, volumetric filler, product belt feeder(s), auger fill, net weigh scale interface, and tilt tray conveyor for automatic pouch loading. The all servo driven design makes the machine easy to clean, maintain, and changeover between carton sizes, speeds, and product fill options. The CVC vertical cartoner accommodates a wide range of products and industries from pet food, pasta, rice, and confectionary to detergent, kitty litter, and industrial components.

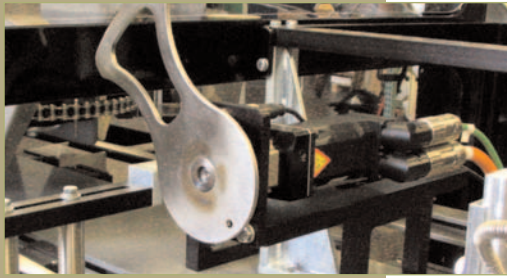

Standard Machine Features:

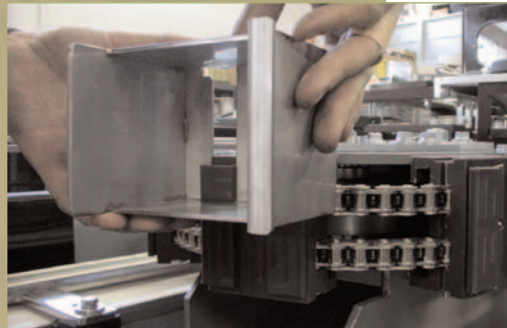

- Precision steel frame with powder coat finish
- All Servo Driven Design
 - Provides quick change-over, accurate jam protection
 - Virtually maintenance-free
 - "On the fly" adjustment for tuckers and glue pattern
 - Continuous or intermittent motion
- 3-Head Rotary Style Carton Feeder
- 6' Powered Adjustable Carton Magazine
- All product contact surfaces are stainless steel or plated finish
- Interlocked Barrier Guarding
- Touchscreen for operator interface
- Wired to NEMA 12 Standards
- Fully convertible for all types of product loading
 - Hand Load, Volumetric Cup Fillers, Net Weight Scale Systems, Auger Fillers, Belt Feeders
 - Tilt Tray Conveyor
- Open frame design for easy cleaning

Standard Carton Specifications

Machine Centers		W x D x H (inches)
6.0	Minimum Maximum	3/4 x 1/2 x 2-3/4 4-1/2 x 3-1/2 x 12
9.0	Minimum Maximum	1-1/2 x 1-1/2 x 2-1/2 7-1/2 x 3-1/2 x 12
12.0	Minimum Maximum	2-1/2 x 2-1/2 x 2-1/2 10-1/2 x 3-1/2 x 12

Servo Minor Flap Tucker

Tool-less Pocket Change

Optional Tilt Tray Conveyor
for Automatic Pouch Leading

Optional Product Belt Feeder Assembly

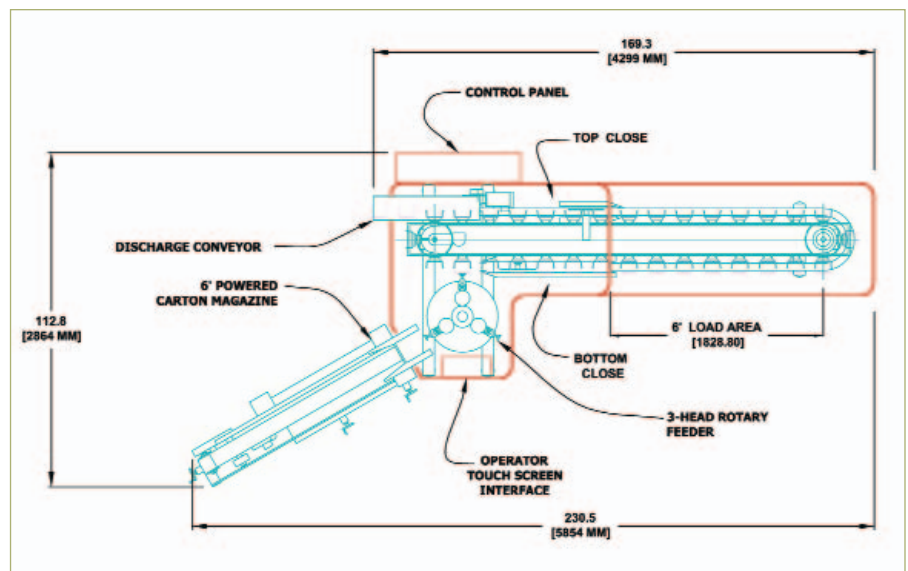

Standard options available with **YEAMAN CVC Vertical Cartoners** to answer your individual cartoning needs

- Full washdown stainless steel construction
- 4, 6, and 8 Head rotary feeders for higher speed applications
- Automatic bottle and can inserting mechanisms
- Automatic pouch inserting mechanisms
- Exact piece count mechanisms
- Coupon/premium placing and inserting mechanisms
- Sealspout inserter attachments
- Sloped adjustable outfeed conveyors
- Carton rotating mechanisms
- Sift proof glue systems
- Code date systems (ink or deboss style)
- Extra long carton magazines
- Extra long compression sections
- Available carton scoreline heights from 24" - 40"
- Vibrating carton track for proper settling of product
- Rotary plunging devices
- Rotary carton closure mechanisms

Machinery Specifications:

Utilities required:

Electrical: 230v/3 phase/60 hz,
24 VDC control voltage
