Take a new look at custom-engineered, innovative, packaging solutions from EDL designed specifically for your application.

- ◆ **Custom-Engineered Film Packaging Solutions to Unitize, Contain and Protect Your Products**
- ◆ **Cost-effective Automatic Packaging Systems for Increased Profitability**
- ◆ **Quality, Customer Support and the EDL Guarantee***

For over 40 years, EDL has designed and manufactured standard and custom packaging systems for manufacturers of consumer and industrial products. Our systems are rugged in construction, reliable in operation, tailored to your application and backed by the EDL guarantee. From pharmaceutical products to construction materials, EDL designs solutions to satisfy the packaging requirements of leading companies around the world.

EDL's Signature Tight Wrap™ Technology

Tight Wrap Technology was developed by EDL to reduce material and energy usage by pulling low-density polyethylene film tightly around your product.

EDL Double Tight Wrap Technology delivers up to 30 percent savings over traditional shrink bundling and over 90 percent over corrugated packaging. Manufacturers of products as diverse as bathroom tissue, bagged charcoal, bandages, ice cream, pet food, sugar and rice benefit

from our signature technology. Tight wrap is more cost-effective than traditional shrink wrapping which only conforms to the product shape.

Tight Wrap technology delivers:

- Cost savings and packaging integrity
- Reduced or eliminated heat for guaranteed energy savings
- Cost-effective total enclosure

Proven Cost-Savings Technology

EDL's Signature Tight Wrap™ Technology

- EDL Bag-Pack System
- EDL Double Tight Wrap provides cost effective, total enclosure on a wide range of products
- Single Tight Wrap utilized for banding, print registered film, tuck and fold total enclosure with no heat

EDL Industrial Packaging Solutions

- Roll Pack for woven and non-woven rolled products
- Panel Pack for large, long products with auto size adjustment
- Wood Pack for reduced packaging costs and added product visibility
- Gypsum Pack for extremely large packages

Standard and Customized Solutions

Standard Packaging Solutions

- Shrink bundlers to suit any production line configuration
- Film size ranges from 4 inches to 70 inches
- Shrink wrappers with a full range of enclosures
- Ancillary equipment includes shrink tunnels, conveyors, marking and material handling equipment

Standard Integrated Engineered Solutions

- Developed to meet the requirements of specific applications such as food, pharmaceuticals, cosmetics and construction materials

Custom Integrated Engineered Solutions

- EDL's innovative technology solutions benefit manufacturers who require the development of specific unique applications

** The EDL Guarantee*

Our guarantee ensures that our equipment performs to the standards specified by the customer
