

## MG FUTURA

### Capsule filler

Output: 6.000, 12.000, 24.000, 48.000 capsules/hour; it is possible to increase machine output by simply adding some elements to the machine main units.

Can handle all capsule sizes from 000 to 5, including tamper-proof capsules.

It can dose: powders, pellets, tablets, microtablets, herbs, liquids.

Different dosing units can be fitted to the machine at the same time thus offering an extremely wide range of product dosage combinations.

Equipped with a control panel with type coloured graphic "touch-screen" display.

It is available in a version suitable for Research and Development Laboratories, where the results of the tests carried out on the machine can be transferred directly to the production area.

On request, it can be equipped with an industrial PC with colour monitor with Windows XP Embedded and an operator-friendly interface to control machine functions.

On request, MG FUTURA can be equipped with the Mod. SWC weight inspector for filled capsules.

Remarks: it is available the version for a speed up to 96.000 capsules/hour only to dose from one to four different kinds of pellets into the same capsule.

The full validation package is available on request, i.e.: FS / DS / IQ / OQ.

### Technical data

Mechanical principle:  
continuous rotary movements

Total installed electrical power (basic machine):  
10 kW.

Compressed air requirements  
(appropriately filtered):  
minimum pressure: 6 bar  
Flow rate: 300 dm<sup>3</sup>/min.

Standard voltage:  
400 V (+/-10%) – 50 Hz –  
three-phase or  
460 V (+/-10%) – 60 Hz –  
three-phase  
Up to: 6.000  
12.000  
24.000  
48.000 and 96.000 (only for Pellets)  
capsules/hour
