

MASTER

Up to six Self Adhesive labels on the same container and 600 Bpm

- Rotary or linear labeller;
- Self Adhesive labelling ;
- Up to six (6) labels on the same container, according to the model;
- Possibility of combined labelling, cold glue and self-adhesive on the same labeller;
- For cylindrical and shaped containers (square, oval, etc.);
- Production speed according to the model, up to 600 bpm

Programmed

The following functions can be programmed by PLC:

- automatic adjustment of the labelling stations and of the head height
- plate rotation by means of servo-driver
- optical centering for champagne capsules
- "L" and "U" seal application using hot-melt glue
- No. 7 cold glue and self-adhesive labelling stations.

The

smallest

A 5-heads model with up to 3 Self Adhesive stations, for a production speed of 3000 bph.

Electronic orientation of champagne capsules:

- Photocell with automatic spot reading adjustment according to different colours of capsules.

- Servo-driver for plate rotation.
- One servo-driver for each plate rotation.
- The plate rotation is controlled by a specific PLC.
- Highest flexibility for any sort of container and label, with specific programs.

Model MASTER - Technical Specifications

Type of labelling	Self Adhesive
Label magazine	FIXED
Production speed	3.000 to 36.000 bph
N. of labels that can be applied	Up to 6 on the same container
Label length	Up to 130mm
Containers	CYLINDRICAL and SHAPED (rectangular, oval etc.)
Container Ø	Up to 120mm
Mixed labelling	COLD GLUE and Self Adhesive
