GW24 Series Batch Style Vial and Ampule Washer

Functions: High production batch washing
Container handling: batch quantities
Container size: 1ml - 500ml ampules and vials
Production output: up to 10,000 containers/hour
Wash time: programmable

This high production batch washer features user programmable wash cycles with coded access and direct loading from shrink-wrap packages. Handles various media including sterile air, water and steam. Changeover is quick and easy and the GW24 Series is exceptionally low maintenance.
