

Miniature Reciprocating Placer

Flexibility is the key to the design of the Miniature Reciprocating Placer. Used for multiple applications or as a dedicated product feeding device, it is a low maintenance machine that offers many options to meet the needs of the user. With the ability to choose from three construction grades and to be a stand-alone machine or integrated to an existing packaging line, the reciprocating placer variations are endless. Every day, manufacturers make every effort to gain extra performance in their production. Minnesota Automation Products from Graphic Packaging can help!

- Up to 90 placements per minute
- Quick adjustments for new products
- 24" adjustable gravity feed magazine
- Self-contained Venturi vacuum system
- High quality components
- Safety interlock on the front guard
- Single source power supply
