

# CAPMATIC®

ALPHA™ C-144 can be configured to handle a wide variety of bottle and cap combinations. From custom worm gear bottle feeders with infeed and outfeed starwheels, to a simple single starwheel transfer system. The Alpha's cap tightening station can be easily converted from R.O.P.P. crimping to threaded cap torquing. With its quick release chuck, these units can be quickly switched in minutes.

Applications: Crimping | Capping  
Speed: Up to 120 BPM\*

Specification	Minimum	Maximum
Cap Diameter:	12 mm	75 mm
Bottle Diameter:	12 mm	80 mm
Bottle Height:	30 mm	160 mm
Power Supply:	220 VAC, 15 Amp , 3 Phase, 60Hz	
Air Supply:	15 CFM at 90 to 100 psi	

\*Speed and performance criteria are subject to testing with actual samples.

Applications
