

# **FELINS** USA, Inc.

## **Bundling Solutions Since 1921**

**ATS US-2100**

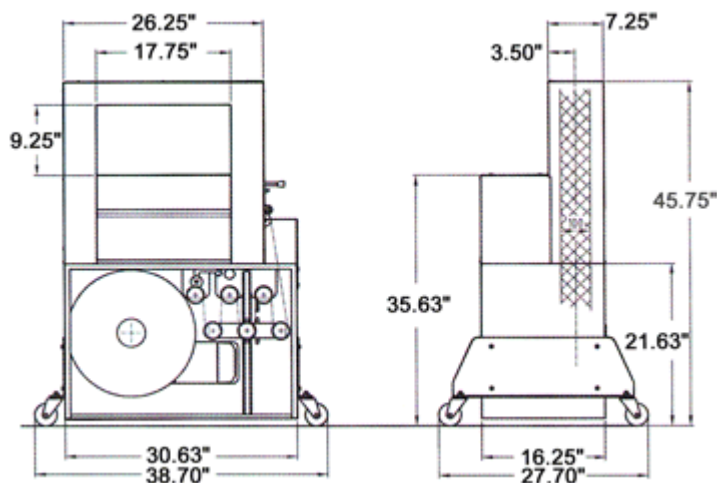

**Wide Format Plastic or Paper Banding Machine**

**ATS US-2100**  
**Wide Format**  
**Banding Machine**

- Wide banding material (3", 75 mm to 4", 100 mm) will eliminate the cost of inner packs and full shrink over-wraps.
- Custom imprinting improves marketing and advertising of your product.
- The Ultra-Sonic cold welding technology ensures fast, clean and consistent sealing. The welder has no heating elements to replace, eliminating film residue buildup. The machine is ready for immediate use without preheating. The adjustable strength weld allows for convenient tear-off as needed.

**Material: 75 mm (3") - 1-00 mm (4") Band Widths**  
**Power Requirements: 115 / 230V**  
**Speed: 25—30 Bands per minute**

### **Key Benefits**

- Wide band bundle security
- Adjustable tension control
- No damage to product edges
- Unitizes small and large products
- Uses printable materials
