Still Handpacking? Upgrade to this cost effective, compact top loader

Brenton's small footprint, top load case packing solution provides a cost-effective alternative to manual hand packing operations. Brenton stands behind the BantamPro with a 20-year tradition of innovation, experience and industry leading customer service and support.

- Multiple packaging operations, including case erecting, loading and sealing, are completely integrated.
- Up to 10 cpm or 20 picks per minute for companies outgrowing their handpacking operations.
- Occupies similar floor space as hand pack operations, with the added benefit of fully automatic performance
- 'Machine ready' cabinet is a standard module expandable up to 16 servos for robot and custom product infeed requirements.

BantamPro

Case packer

A good solution for contract packers, specialty product makers, limited time offers and new product launches – for anyone facing the dilemma of adding to their labor expense or investing capital in more throughput than they really need.
