# ACCRAPLY®

Model 35PW "S" Series
Panel and Wraparound Labeling System

Features:

- Heavy-duty construction utilizes oversized drive components combined with an aluminum and stainless steel base frame for years of dependable service

- Adjustable variable speed conveyor

- Quick "no-tools" adjustments with position indication for fast, repeatable changeover

- Various product infeed systems are available that provide precise product spacing and orientation

- Centrally driven overhead stabilizer belt provides large finishing area and zoned pressure system to compensate for container height variation

- Convenient, centralized pivoting operator interface controls

- Advanced high torque micro-stepping driven applicators include ratio-offset and speed-following capability for accurate and reliable application of a wide variety of label materials

- Drop-in-from-the-top label threading with quick release rewind reel core

- Air-assisted contour following label peelers provide excellent finish on oval containers

- Multi-positional, line-driven wraparound assembly for cylindrical applications

Barry-Wehmiller

Model 35PW "S" Series
Panel & Wraparound Labeling System

Description

The Accraply Model 35PW "S" Series is an extremely versatile labeling system designed for the application of front and/or back panel labels on square, rectangular, or oval containers. With the optional multi-panel wiper assemblies, the Model 35PW "S" Series can also apply two-, three-, or four-panel labels.

Rugged construction for demanding, continuous-duty operation; quick, easy changeover capability from one product to another; and proven technology make this system an exceptional value.

All specifications and tooling requirements are subject to Accraply evaluation of all label and product samples. Specifications below reflect standard machine capabilities. Accraply can also meet other specification requirements. Please call for details.

Optional Features:

- ADDITIONAL LABEL APPLICATORS
- HOT STAMP PRINTER OR THERMAL TRANSFER PRINTER FOR LOOSE-LOOP PRINT AND APPLY APPLICATIONS
- WIDE WEB LABEL CAPACITY
- FEED SCREWS OR SQUARING ROLLERS FOR PRODUCT ORIENTATION
- MULTI-PANEL LABEL WIPERS
- VARIOUS WIDTH WRAP ASSEMBLIES
- CLEAR FILM LABEL SENSOR
- OUTFEED PRODUCT BACKLOG SENSOR
- CONVEYOR EXTENSIONS
- POWERED REWINDS AND UNWINDS FOR LARGE LABEL ROLL CAPACITY
- SPARE PARTS KIT
- INSPECTION OPTIONS
- INFEED AND OUTFEED TURNTABLES

Total Value

Accraply knows that accurate labeling demands consistent product presentation. That's why Accraply leads the industry in developing innovative product handling systems that give packagers the accuracy they need. And, extremely versatile wraparound, side panel, and multi-panel labeling on a wide variety of containers make our applicators ideal for contract packagers too.

We work with you to develop the best design for the job. And we follow through with the best factory support in the business - from installation and start-up to complete training, routine maintenance, technical upgrades, and complete machinery rebuilds. That's why our integrated labeling systems are the machines to beat in every industry where speed and accuracy is critical.
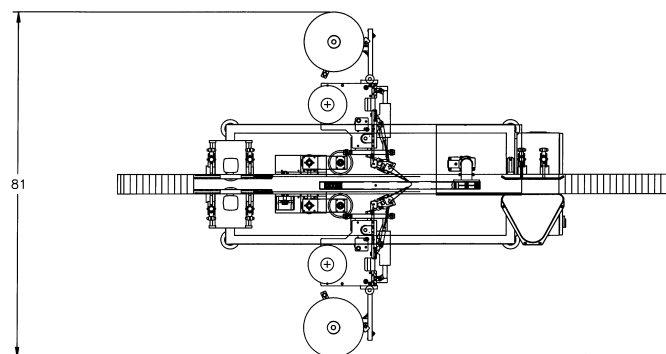

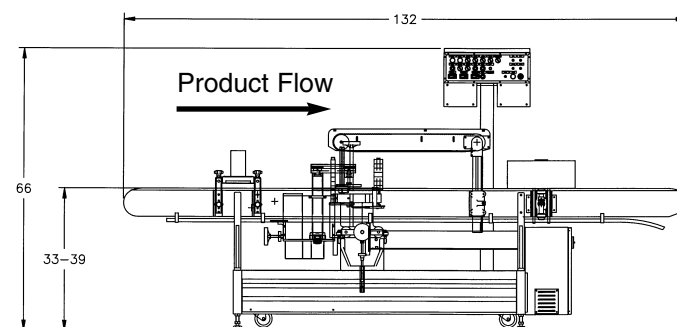

Accraply ... all the speed and accuracy you'll ever need.

Machine Specifications

- **APPLICATION SPEEDS:** Applicators available for web speeds up to 2000 inches per minute

- **ELECTRICAL:** 110 VAC , Single Phase, 60 Hz, 15 Amp Service (220 VAC required with some options)

- **AIR:** 60 PSI (required with some options)

- **PRODUCT CONVEYOR:** 4.5" wide flush sided

- **PRODUCTION RATES:** Up to 600 per minute depending on product and label sizes

- **PRODUCT CAPACITY:**

Maximum -	length:	12"
	width:	8"
	height:	12.5"
Minimum -	length:	1"
	width:	0.75"
	height:	1.75"

- **LABEL CAPACITY:** 12" Rolls, 3" Cores

Maximum -	length:	12"
	height:	6"
Minimum -	length:	0.375"
	height:	0.375"
