

Cartoning machine series Cartonetta

Proven packaging technology - the leading edge.

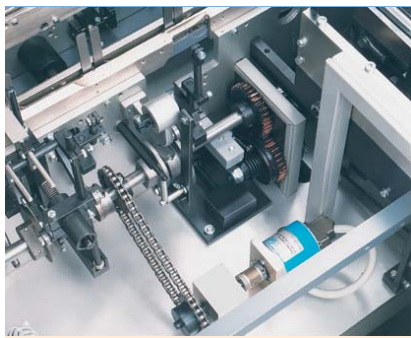

The Cartonetta is an unusually successful machine. It has been sold over four thousand times on account of its high degree of flexibility and their reliable functions. It is one of the most widely sold cartoning machines all over the world.

Harro Höfliger supplies fully overhauled and modernized Cartonetta machines. Customers' own machines in this series are also fully overhauled and modernized. More than 230 machines have been delivered to date.

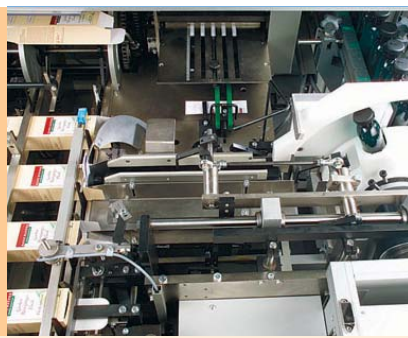

A variety of cartoning tasks can be solved economically with the Cartonetta thanks to:

- the favorable price/performance ratio
- the same dependable operability as with a new machine – with a warranty
- short delivery times and fast commissioning
- flexible add-on devices, non-standard equipment and feeds for sachets, bottles, tubes, blisters, cans etc.
- fast spare parts delivery

New for old – with a guarantee for operability and reliability as for a new machine

For each and every product an individually adapted machine

Various feed systems as here via a cascade transfer

The ideal entry model for the small and medium-sized operation:

- well-arranged, uncomplicated construction
- high degree of operator safety
- continuous output of up to 60 packs per minute
- versatile deployability
- large size range
- central adjustment of the product and folding carton chain
- dependable product and leaflet insertion
- easy processing of blisters, tubes, bottles, bags, technical items etc.
- mechanical safety in compliance with the valid regulations
- programmable logic control

Use the advantages of our specialists:

- short delivery times
- professional service
- non-standard equipment and additional sizes
- spare parts delivery at short notice
- guarantee as with a new machine

In addition Höfliger is able to provide all the capabilities that are required for customized feed systems with a broad range of different tasks. The conveyance and handling of all products ranging from fragile to non-sensitive are in good hands with us. In addition Höfliger supplies product magazines, grouping devices, stacking devices, and folding carton magazines.

At the same time we tailor your cartoning machine to your products. This provides you with all the advantages of modern technology.

You will find further folding carton products in our brochure "Carton Manual".
