

Reliable, Affordable, Versatile Cartoning Machinery

80 Series Carton Top Closers

The 80 Series cartoners have been in use in many industries since the early 1970s. The 80 Series is ideal for trays with tuck or glue tops, hinged covers, locking edge tabs, autobottom cartons, or tall, unbalanced products, and provides modest speed capabilities. For sealed tops, one unit can handle single flap glued to outside, single flap glued to top, two major flaps glued together, etc. The Top Closers are easily attached to the 50 Series carton erectors. The 80 Series has proven itself durable in even the most extreme working conditions.

Modular Top Closing Cartoner

Model 82 Top Closer

- Automatically top closes many styles of cartons, including difficult or time-consuming ones for hand labor
- Cartons can be fed in by hand or with a power conveyor
- Speed range adjustable from 5 to 60cpm
- No change parts needed for different size cartons

Automatic Top Closer Cartoner

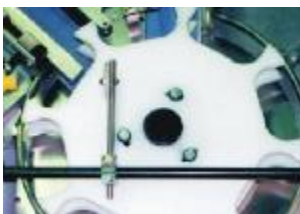

Model 84 Extended Top Closer

Model 84 Extended Top Closer with Loading Station

- Unlike the Model 82, the cartons are carried within the lugs during manual loading, for extra carton handling
- Ideal for tall cartons with unwieldy products
- Runs glue seal cartons with tear-away strips
- Can be integrated with fillers, bowl feeders, or other loading devices
- Adjustable speed range from 5 to 60cpm

Automatic Bottle Loading

- Model 84A is equipped with a bottle loader, to load up to 2 bottles
- When placed inline with the 54L carton erector, provides fully-automatic cartoning
