# Affordable, Shrink Banding Solutions for Tamper-Evident Packaging

## You'll be surprised at how well the M-5 and M-6 Series perform.

Tamper-evident packaging is a way of life in today's marketplace. Surveys have shown that customers like the security of products that use tamper-evident packaging and are consistently preferred to those that do not. When companies start out they often use manual operations to apply tamper-evident banding. And as they grow they often need to automate this process to grow and increase volume.

An excellent choice for entry-level automation equipment is the M-5 and M-6 systems from Marburg. With a rate of up to 100 bottles per minute (BPM), these machines can really turn out the product. And, they can handle a full 3" band length.

So when you're ready to take the step in to packaging automation, call Marburg Industries. We've got machines for every operation. From low-volume banders to high-speed production units, we can match the machine to your needs. We can get you into an affordable unit that will pay for itself repeatedly as your company grows.

## The M-5/M-6 series AutoCapsealer™ is the perfect choice for entry-level users.

Simplicity of design and user-friendly interface means it can be used by any employee. What's more, its design makes it easy for maintenance and line personnel to operate and understand.

## Change-over from one size to another is a snap.

The small footprint and rugged stainless steel construction allows the system to fit into most production lines without major changes.

## Marburg makes industrial-grade equipment that can withstand years of rigorous use.

Dozens of high-profile users choose Marburg equipment because it's built to last and easy to maintain. Check out the other guys first and you'll see for yourself why the winners choose Marburg.

*Advanced Pharmaceuticals  
Denison Labs  
Integrated Health

Van Law Foods*

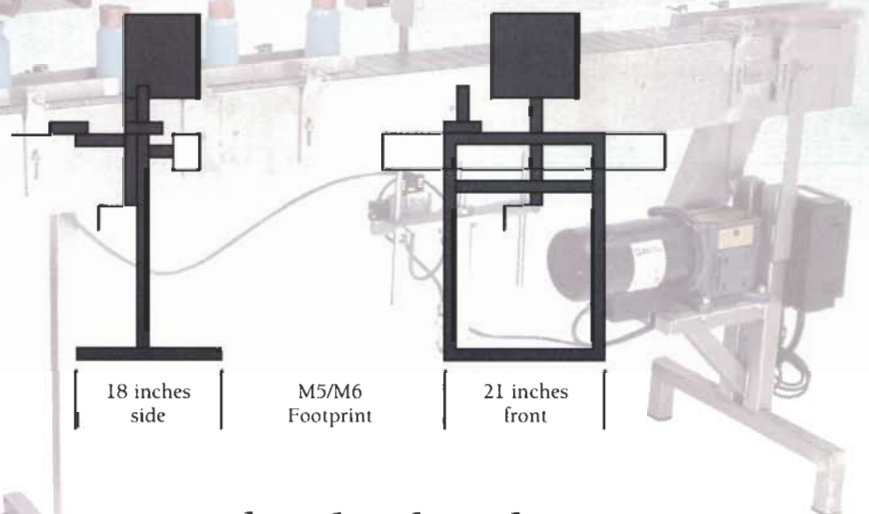

## Versatile options give users plenty of choice

A key advantage to Marburg automation equipment is that it's easy to customize. When your situation changes and needs grow, it's a breeze to add the following options that will reduce labor costs and speed production.

- **Conveyor**
- **Heat Tunnel**  
Shrinks T-E banding automatically.
- **On line Perforation**  
Automatically provides cut band with a vertical perforation line.
- **Photo Registration**  
Accurate cut alignment when using printed PVC.

## Powerful features mean greater production capability.

- Speeds of up to 100 BPM
- M-5 Series size range: 25 to 90 mm LF
- M-6 Series size range: 25 to 122 mm LF
- Band lengths to 3"
- Five minute change over
- Bottle handling spacing wheel
- Stainless steel construction
- Easy wash down
- Small size- very compact
