- Small Footprint

OPERATION:

FLAIR FLEXIBLE PACKAGING delivers printed laminated roll stock to the **NISHIBE** and **Slide-Rite®** slider closure is secured on to the pouch. Empty slider zipper pouches are loaded onto the **PSG LEE** in-feed conveyor, are opened, filled by **Yamato** scale and heat sealed. Filled pouches are packed on a **Blueprint Automation** packer and tray is overwrapped on the **PMI** bundler machine.

Blueprint Automation

Blueprint Automation is a world leader in packaging automation, providing solutions for the loading of flexible pouches and other hard-to-handle packages into secondary containers.

Blueprint Automation Case Packer

PMI Bundling Machine

PMI Finished Product

PMI manufactures tray wrapping systems for display-ready trays of StandUp pouches. Display-Ready Packaging serves a broad range of markets. The combination of corrugated tray packs with film wrap offers material cost savings and maximum product protection.
