

# FormPacq™

Series of automated carton erecting systems

## Carton erector Formec

## Carton erector

Cartons handling device (adhesive tape closure version).

Adhesive taping unit with end of roll and tape-break signal.

Carton erector designed to automatically open the carton, close the bottom flaps and seal them with either hot-melt glue or adhesive tape.

### Wide range of carton sizes possible

Due to streamlined and accurate construction, a medium production rate at a high level of reliability is possible for both small and large cartons and sizes in between.

### Format change in 5 minutes

Due to the user-friendly adjustments in easy to reach positions the machine can quickly be changed to work with a new cartons size, particularly useful if a large number of cartons sizes are used.

### Carton infeed whilst machine is running

The carton magazine is designed in such a way as to allow the carton blanks to be placed in the magazine whilst the machine is running.

### Fault-finding for quick resolution of any difficulties

The machine programme has a faultfinding diagnosis to help solve rapidly any problems should they occur.

### Formec technical data

Speed	cycles/min.	up to 20
Max. installed power	kW	2 (hot-melt +2)
Air consumption	NI/min.	250 (hot-melt +100)
Air pressure	bar	6/7

### Formec C \_\_\_\_\_ A B C (mm)

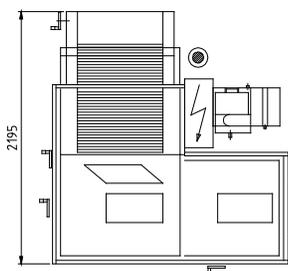

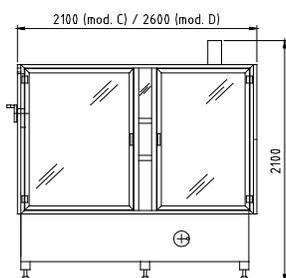

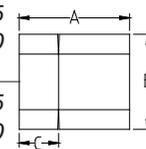

Format range	min.	345	330	115
	max.	750	610	400

### Formec D \_\_\_\_\_

Format range	min.	445	330	115
	max.	1030	760	400

### Formec Maxi (uo to 4/5 cycles/min.) \_\_\_\_\_

Format range	min.	450	330	130
	max.	1200	1200	600
