

Mistral BA

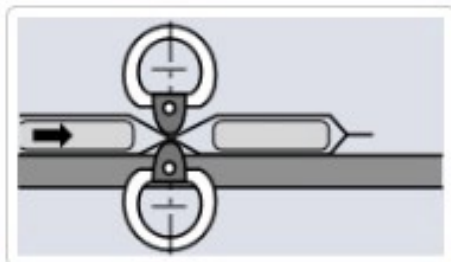

MISTRAL changes the world of Modified Atmosphere, *combining packaging speed with hermetic sealing.*

A flow-wrap packaging machine which produces packs sealed on three sides from a roll of heat-sealable packaging film, the Mistral is designed for high-speed MAP packaging..

Features

- Exclusive patented **Long Dwell** transverse sealing system, available in the following versions: 1-2-3-4 crimpers per shaft (High Speed).
- **Cantilever construction:** the mechanical and electronic components are housed at the back of the machine, with only the sealing units at the front. Thus, cleaning, hygiene and maintenance operations are facilitated.
- Built in AISI 304 stainless steel, with the casing built with rounded corners in accordance with the strictest international hygienic standards.

Available versions:

- Basic mechanical version
- Electronic version (2 axes)
- Servo version (3 axes), colour touch screen, on-line help system.
- High Speed Long Dwell version with 2-3-4 crimpers per shaft
- Version with film roll mounted in a high or low position
- Version for BDF packaging material.

TECHNICAL DATA:

- Suitable packaging materials: laminated, bonded or micro-perforated polypropylene, polyethylene, gas barrier materials.
- Packaging speed: up to 140, and up to 400 packs/min .
- Packageable product size: length min 100 mm max 350 mm; width min 10 max 320 mm; height max 110 mm (depending on the sealing system used).
- Automatic loading systems: in line, 90° and drop down loading, along with many other systems designed according to specific requirements.
