

HIGH DUST & LIQUIDS

NEW

BAG LOADING

The process starts with up to 300 empty pouches being placed into the adjustable cartridge. Bags can be loaded while the machine is in operation.

*Adjustable
Cartridge*

BAG OPENING

Pouches are individually removed from the cartridge with a unique combination of vacuum and pneumatic actuators. They are rotated to the fill area and opened.

*Adjustable
Vacuum
Bag Opening
Assembly*

BAG DETECTION

Multiple bag detection switches are used at various points in the cycle to ensure correct bag placement and full bag opening. Should a reject bag be detected it is ejected from the machine and the process continues. Rejected bags can be inspected by the operator and re-used if good.

TRANSITION CHUTE

*Transition Chute
enters bag to
prevent spillage
and protect seal
area*

Doubling as a timing bucket, product enters the transition chute while the bag is being opened below. Upon pouch detection the chute enters the bag and opens its gate. Product is dispensed immediately, without spillage and protecting the seal from contamination. Difficult product that easily bridges is dispensed into the pouch directly from the filler, through the "open gate".

FILLING

During filling, pouches are held in place with our "posi-hold" gripper system. This allows for heavy weights and shock loads without disturbing bag position.

SEALING

*Teflon Coated
Ribbed Seal Bar*

Digitally controlled, the ribbed or flat constant heat seal bars give a integral attractive seal. Pouches are sealed "in place" eliminating wrinkles, folded corners and non aligned seals.

MACHINE CONTROLS

*Simple to use
Touch Screen
for monitoring
and operation of
machine*

System controls are fully solid state, utilizing a commercial Programmable Logic Controller (PLC) and pneumatics. Indicator lights signal all cycle processes for easy monitoring.

START UP KIT

Complete with operation & maintenance DVD, manual, programs & PLC cable Ensures for an easy start up and operation.

OPTIONS

- Washdown Models
- Product Settler
- Gas Flush
- Embossing, Printing
- Take Away Conveyors

*Wash-
down
Model
Shown*

Our high dust & liquid models allow for contamination free seals and dust extraction.

SPECS

M7000 4" - 12" Bag Face Width
M7000L 12" - 20" Bag Face Width
Power: 120 VAC 20 Amps
Air: 7.0 CFM @ 80 PSI
M7000 Footprint 20" x 56"
M7000L Footprint 28" x 64"
