

JONES ADJUSTABLE POUCH KING®

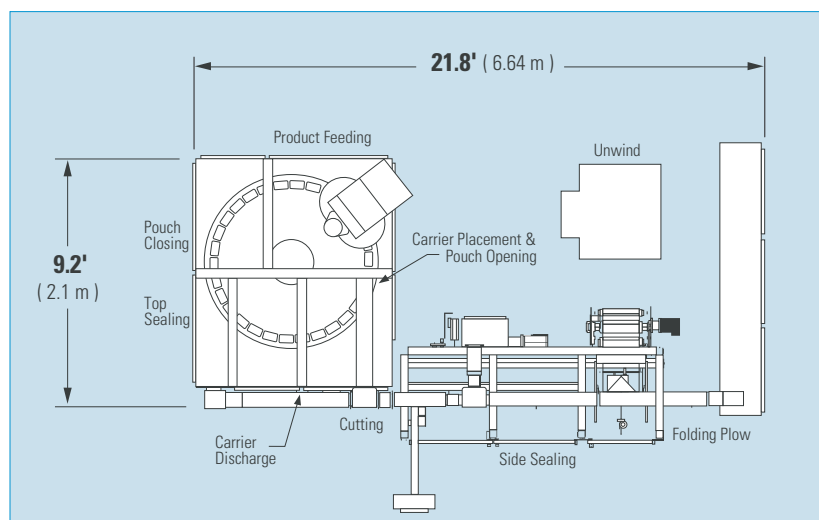

High Speed with Advanced Flexibility

- Horizontal Form Fill and Seal

JONES ADJUSTABLE POUCH KING®

Horizontal Form Fill and Seal

This continuous motion horizontal form / fill / seal machine from OYSTAR North America advances flexible packaging to a whole new level. The Adjustable Pouch King® provides quick and repeatable pouch size changes, using few or no change parts. At the same time, OYSTAR North America's proven high-speed forming and filling technology delivers up to 500 pouches per minute. Other innovations include a remote filling module for improved sanitation and flexibility, and a new configuration with better ergonomics and easier threading. It all adds up to unparalleled speed, flexibility and economical operation.

Product Features

- High speed up to 500 pouches per minute
- Quick, repeatable pouch size changes
- High reliability for 24 / 7 operation
- Separate modules for filling and sealing
- Fully servo driven
- Touch-screen HMI
- Stainless steel frame

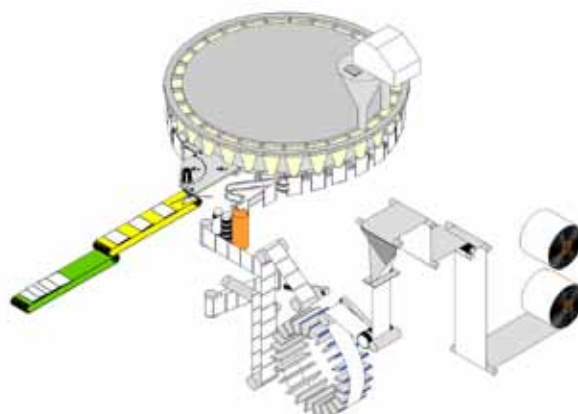

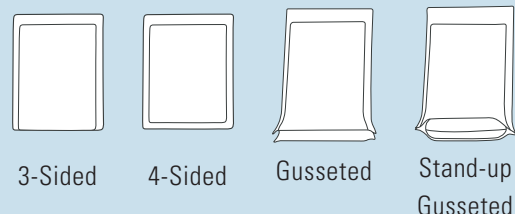

Modular Product Feed System

- Auger
- Vibratory pan
- Servo metering belt
- OYSTAR North America's patented ring feeder
- Gravimetric
- Adjustable cup feeder
- Net weigh scales

Innovations & Options

- Multiple component filling (online blending)
- Capable of handling 3 or 4 sided, or gusset pouches
- Optional washdown filling module
- Automatic web splicer
- Pouch printing and coding
- Easy-open tear notch
- Integrated cartoning systems
