

Wrapping Machine VP

Examples

OPP film wrapping for flat products of all kinds of shapes and formats (telephone cards, greeting cards, register, sticker, labels).

To meet changing customer needs our modular machine design allows the integration, connection and upgrade of different elements in a flexible way.

High output is guaranteed by multi-track machine

Several additional functions as

- thermal transfer film printing
- labelling
- banding
- stacking

Advantages at a glance

- modular designed concept, nearly in any way expandable
- flexible, multi-track transport- and sealing unit on demand
- 2-film guiding system (upper-/lower film) also pre-printed
- sealing technique selectable (sealing wire or permanent heated sealer bar)
- infinitely size adjustment, scales
- high quality machine concept
- user friendly operator panel, storable program parameter

Technical Machine Equipment

- cycle output up to 100 cycles per track (product dependent)
- formats: Credit card up to A4
- feeder systems according to requirements
