

3701-11 -21 Series - Automatic overwrapping machine

Automatic overwrapping machine

Machine capability: Complete overwrapping of parallelepiped products.

Wrapping material: Cellophane, PVC, PP and all heat sealable films from reel.

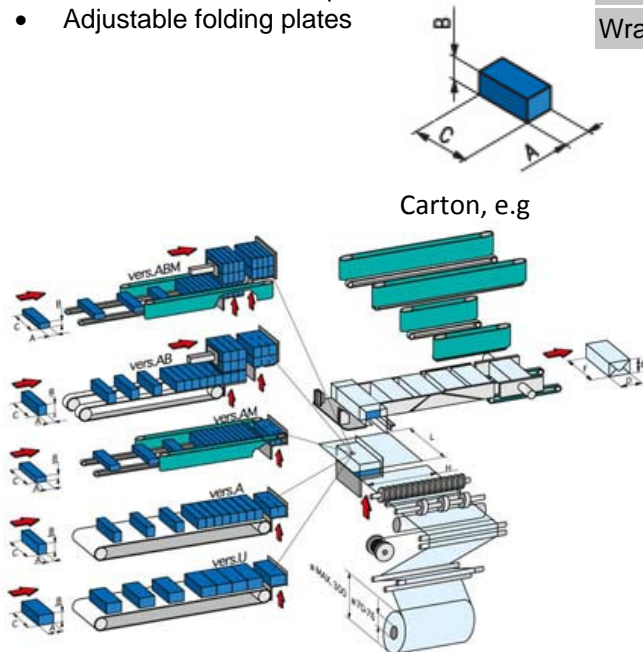

Markets: Foods, confectionery, tea, coffee, tobacco, paper, cosmetic and pharmaceutical industry.

- Oiltight steel frame containing all motions
- Easy cleaning
- Oil bath lubrication
- PLC: Siemens
- Standard electric components: Siemens

Device to lift film driving rollers during product elevation enabling to use extremely thin films and avoid film sliding around the product. Quick change-over features. Each machine is supplied with the following documentation: electrical diagrams with lists of the components, maintenance and use manual, spare parts manual with exploded drawings and parts identification tables, change-over manual showing the sequence of operations.

Optional groups

- Film print registration unit
- Additional reel holder
- Tear tape group
- Wheel for machine displacement
- Adjustable folding plates
