

## THE STANDARD OF THE INDUSTRY

STANDARD SPECIFICATIONS	L-12	L-18
Film Width (approx.)	12" (305mm)	18″ (457mm)
Package Widths (approx.)	3",2",1-1/2",(76,51,38mm)	4 1/2",3",2 1/4",1 1/2" (114,76,57,38mm)
Package Lengths (minmax.)	2 1/2" to 6" (64 to 152mm)	2 1/2" to 6" (64 to 152mm)
Packages per cycle	4, 6 or 8	4, 6, 8, 9, 10 or 12
Cycles per minute	15 - 70	15 - 100
Fill Volume Range	.05 - 3fl. oz. (1.5 - 88ml)	.05 - 6fl. oz. (15 - 178ml)
Fili Temperature Range	40" - 195°F (4" - 90°C)	40° - 195°F (4 - 90°C)
Amperage @ 220V, 3Ph.	30	60

The Winpak Lane L-12 and L-18 are high-output vertical form-fill-seal pouch packaging machines. This industry workhorse is capable of packaging a wide variety of pumpable products at production rates up to 1,200 packages per minute.

They produce a high integrity sealed pouch by combining two separate rolls of packaging film. Packages of varying widths may be run with the use of appropriate change parts. A twelve-across pattern is the most common for packages with fill weights from 2 to 12g. A six-across pattern is typical for 1 to 2 oz. (28-85g) packages, such as salad dressings. Changeover for different package widths and number of packages across the the web can be made

in one or two hours. Package length can be easily adjusted in minutes.

Package features such as easyopening notches and perforations,
pouring spouts, drip-resistant
openings and channels make your
packages as "user-friendly" as possible.

Accurately fills products as thin as
soy sauce to as thick as peanut butter.
The industry standard for dairy, food,
cosmetic, pharmaceutical, and industrial products.

"Atmospheric Control" option provides gas-injection for superior hot filling or modified atmospheric packaging.

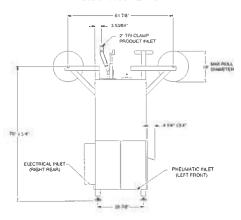

Other options include: large film roll system, front and back registration systems, edge control systems, splice detector, product tanks with controls, diaphragm fillers, clean-in-place

manifolds, embossing code daters, package gate, splash guard, Allen Bradley controller, product weight adjustment while running, and remote emergency stop.

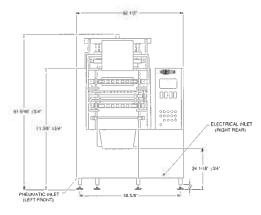

"New - Quick Changeover L-18 Pouch Machine". The Contract Packagers Dream!" Using the world's best selling, most reliable pouch machine as a starting point, Winpak Lane's innovators have optimized it for quick changeovers and given it the ability to be precisely tuned to each product produced. This allows the fastest run speeds for each product, repeatability and speed during changeovers using recipes for setting up.

Finally a machine tailored to your contract packaging needs... no more compromises!
