

VC999[®]

PREMIUM PACKAGE

Small Footprint, BIG POWER.

RS420c

RS420c Compact

THE PERFECT COMPACT THERMOFORMER

The VC999 rs-Series Compact thermoforming machine makes its own deep-drawn packages from film. Your products are easily loaded, sealed and ready for delivery to customers.

Thermoforming Advantages:

- Longer Shelf Life
- Reduced operating cost with few employees needed
- More control over package sizes & shapes
- Many products can be packaged on a single rs with unlimited die configurations
- Lowest packaging cost with film used as basic material
- Minimal material storage cost, packages in various shapes can be made off the same film rolls
- Packages can easily be used for industrial or retail consumer purposes
- Maximum packaging performance

The Standard in Form-Fill-Seal Packaging Machines.

VC999 designs ideal product packaging solutions for your company to meet future retail and wholesale consumer demands.

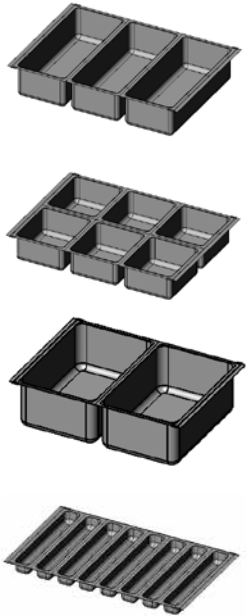

RS420c Features

- Simple, reliable functionality
- Stainless Steel construction
- Quick-change tooling
- Free lifetime tech support
- Runs on reliable PLC platform
- Online manuals available
- Heavy Duty 5/8 Pitch K-Transport Chains
- Sanitary design for easy washdown
- Expandable design to meet future needs

Available Options

- Automatic chain lubrication
- Coding, labeling & printing
- Conveyor systems
- Customized form and sealing tooling
- Hole punch devices
- MAP gas options
- Multiple cutting options
- Printed top film photo registration
- Printed forming film registration
- Product support
- RS shrink application
- Seal only mode for easy product protection
- Tear notch
- Water chiller

Technical data	
Machine type/width	285, 320, 355, 420 mm
Max. index length	300 max
Loading length	650 mm
Discharge length	750 mm
Draw depth	50, 100, 135 mm
Forming width of lid film	323, 358, 423 mm
Tolerance +/- 1 mm	
Film roll diameter	400 mm 3" or 6"
Roll core 76 mm / 3" (standard); Adapter for 152 mm / 6" available	
Power supply	400 V / 3 / 50 Hz; 220 V / 3 / 60 Hz (others available)
Compressed air min.	7 bar @ 850 l/min
Technical changes reserved	

Cutting station
Packages are separated
Film trim
is automatically removed

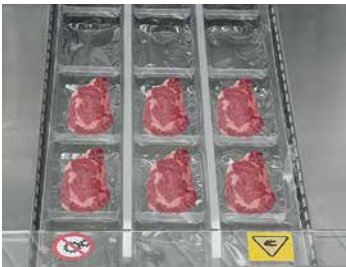

Sealing station
Packages are evacuated,
gas flushed (MAP) if
required, and sealed

Top web
infeed from above
(integrated brake system)

Loading zone
Products are loaded into
formed pockets

Forming station
Rigid or flexible bottom
web is heated and formed
into pockets

Bottom web feed
with rigid or flexible bottom
web with fast film change.
A brilliant space saver.

PREMIUM PACKAGE

Committed to Customer Satisfaction

- Your innovative packaging partner
- Industry experts
- Efficient, reliable machine designs & operating systems
- Professional on-or-off site training sessions
- First class global service organization
