

Vertical Line

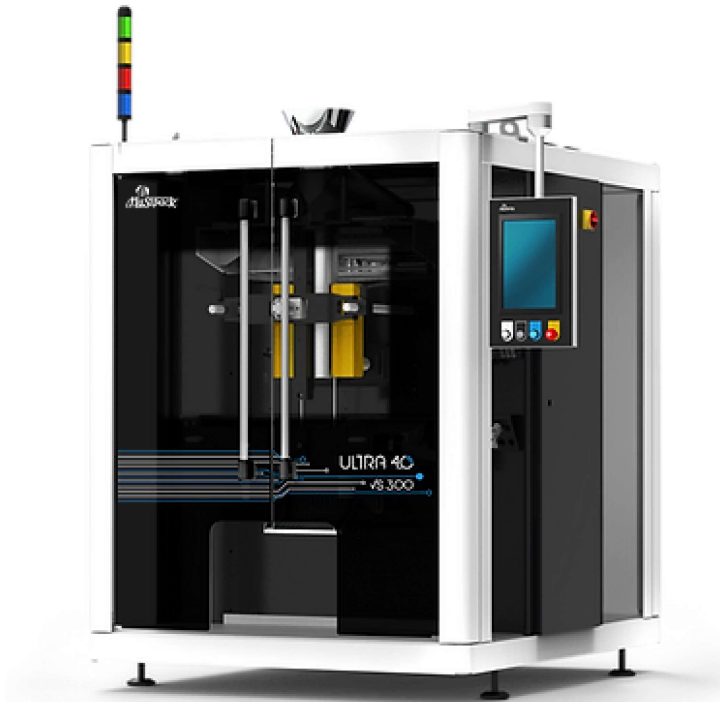

Ultra VS

The Ultra VS offers flexibility and high productivity for vertical packaging with reduced physical space. Capable of packaging solids, grains, paste, liquid, and other products into flexible packages.

Intermittent servo-driven horizontal sealing jaws to optimize speed and integrity of the package.

Built with an enclosed structure to meet international safety standards and regulations.

Easily integrated into any type of scale and filler.

Ideal For

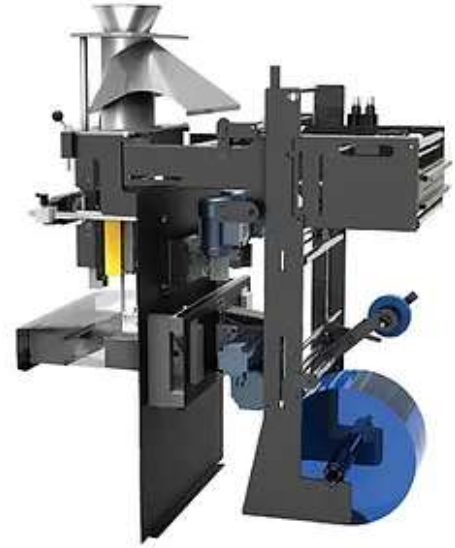

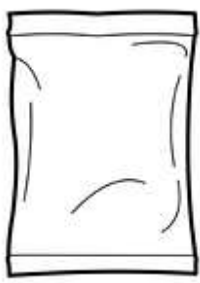

Large variety of products, such as snacks, confectionery, grains, powders, liquids, pet food, and others

Technical Specifications

Models	Package width (min – max) ***	Package length (min – max)	Max. Roll of film diameter	Max. Roll of film width	Machine dimensions (L x W x H)	Speed (packages per minute) **	Air consumption
Ultra VS 300	50 - 300	50 - 460	450	630	2293 x 1314 x 1845	100 **	800 nl/min.
Ultra VS 400	150 - 400	200 - 570	450	850	2293 x 1575 x 2056	70 **	

*Unit of measure used: millimeters
**Specifications of the equipment may vary, depending on the size of the packaging and the product used.
*** For each different size is required purchase of different forming tooling.
