Case Formers

Production starts with case forming, and no one does it better than Little David®.

Loveshaw offers 3 models, all with standard features, that result in reliable quality forming:

- Powered hoppers to reduce the chance of dropped cases
- Positive drive, not belt driven to insure square cases

- Quick case size changeover — no tools required
- Pneumatic tuckers to reduce the chance of crushed cases
- Allen Bradley PLC for reliability

- Heavy-duty Case LockerST™ tape cartridge, the industry's best

Little David® Case Formers can accommodate a large range of box sizes and have machine dimensions as low as 77" wide.

Start with reliably formed cases.

Case Sealing

After the package is filled a quality seal is next. Since 1961, Loveshaw has been the leading manufacturer of case sealers. Visit any manufacturing facility anywhere from Maine to California, or from Canada to Australia, chances are you will find a Little David® case sealer sealing cases 24 hours a day, 7 days a week.

There are reasons Little David® is number one in case sealing —

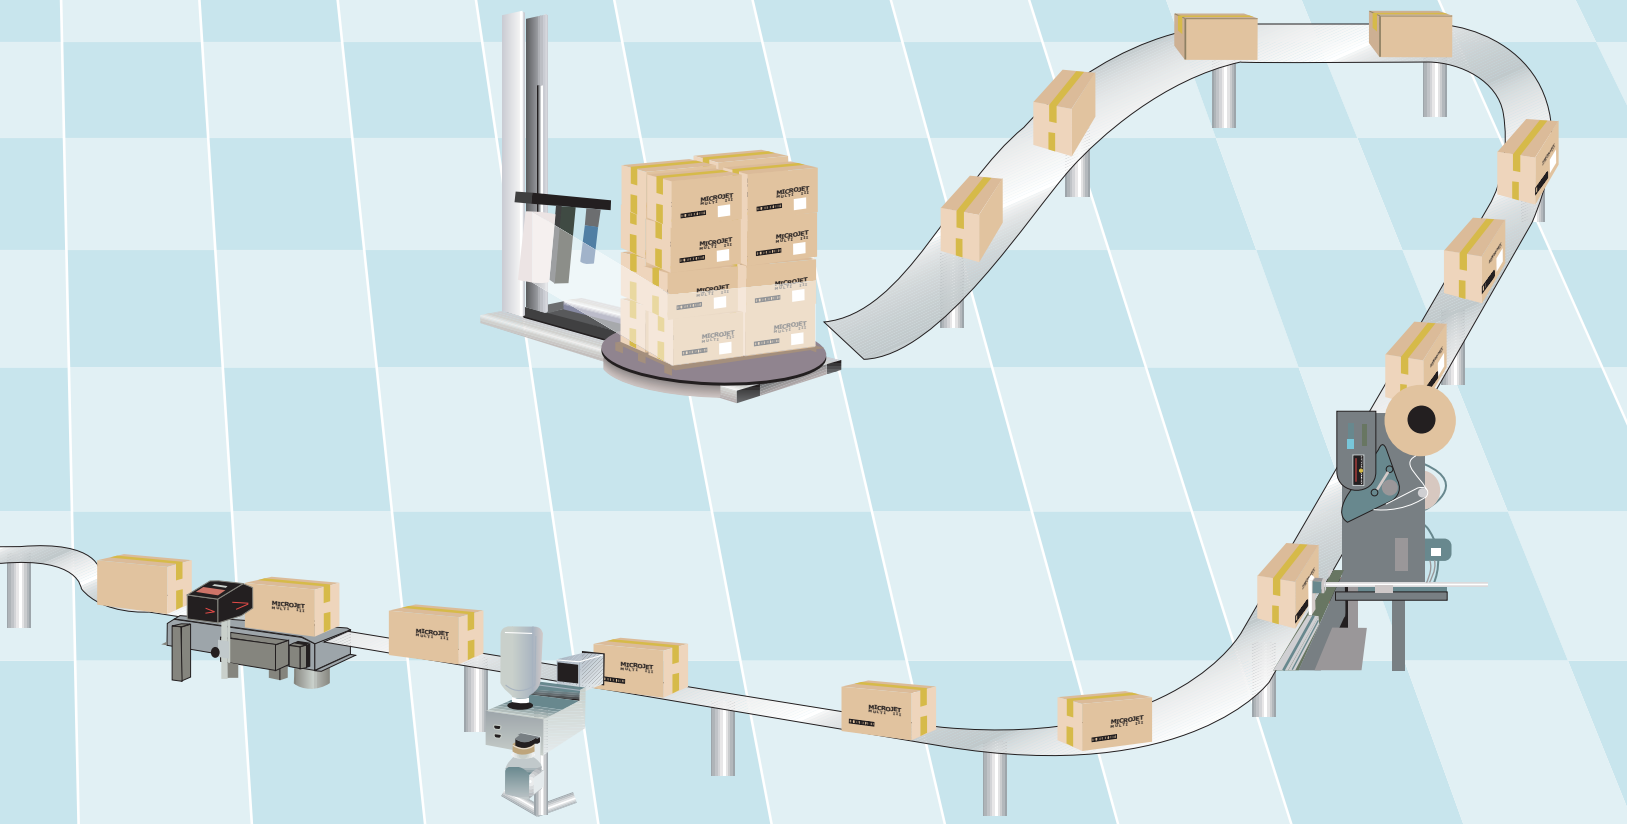

- Safe single mast design
- Fastest box size changeover — slide and lock adjustments
- UL Listed — unique to Little David case sealers
- Extreme box size ranges
- Heavy-duty Case LockerST™ tape cartridge, the industry's best

Fully Automatic or Semi Automatic
Uniform & Random

Being number one is no accident!

Ink Jet Printing

Proper product identifiers, such as time, date and batch codes, or high quality company logos, graphics, bar codes or alphanumerics, are key to bringing the right product to your customer. Loveshaw has been producing high quality industrial strength ink jet printers for over 20 years. Relying on the outdated or unproven technology of others will only result in mismarked or unmarked product. Loveshaw's line of inkjet printers have been proven over time, just ask one of our 30,000 Microjet users.

Product Line:

- Low cost, 1-3 line large character, self-contained printers
- 1-6 line, 2 side, large character printers
- Low cost, high resolution, 1-5 line, alphanumeric printers

- High resolution graphic, bar code and alphanumeric printers designed for low maintenance.
- Small character wax printers for non-porous and porous surfaces using non toxic inks

Labeling

At first glance it seems all label companies are the same. There is a difference, so don't chance finishing your product with anything but a properly applied label. Since 1967, our label application systems have been the industry standard. Just ask the USPS why they chose Little David® over 20 other manufacturers in a recent performance test.

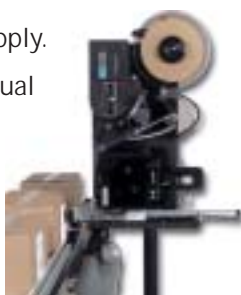

- Dual frame results in a stronger labeler and eliminates web drift
- Balanced feed assures consistent label accuracy
- Microprocessor driven controller
- User friendly label format software
- Modular construction

Nothing finishes off a quality package like a quality label.

Apply only. Print and Apply.
Apply to single panel, dual panel or corner wrap.

National Accounts Program

Loveshaw, an ITW Company, understands the needs of companies with multiple locations. Dealing with one source is a priority. We have created a National Accounts program that is designed to minimize transactions, reduce contact information and lower costs. As a Loveshaw National Account, you will be assigned a single National Account Manager who will work with you to help simplify your packaging machinery needs. Having a large range of quality products combined with a network of over 350 factory trained service locations, makes Loveshaw the clear choice as a single source provider for all your packaging needs.

Integrator Program

System Integration requires the cohesion of multiple manufacturers who can provide quality on-time products. We at Loveshaw, an ITW Company, understand these needs and have designed an Integrator Program that provides on-time quality engineered packaging machinery that works the first time and every time. Our team of 8 engineers has years of experience incorporating our vast line of machinery into the most complex of packaging lines. From our Systematic 36 for small cell manufacturing to large postal facility integration, we have proven our technology and expertise.

Systems

Purchasing four different lines of equipment from four different manufacturers not only adds cost to a project, but can you be sure they will work together? How many times will you have to coordinate service calls to get you system back on line? How about 4 different maintenance mechanics? Loveshaw, an ITW Company provides systems that are designed, tested, delivered and installed to work together the first time. Our systems are designed on state of the art 3D cad software to insure perfect integration and effortless operation. From simple case "sealer-inkjets" to large "form-fill-seal-print-label" systems, our expertise will reduce downtime, maintenance and overall costs.

Three Standard Systematics to choose from:

Systematic 36: CF-20T + LD-16 + Product Control Conveyor

Systematic 46: CF-30T + LD-16 + Product Control Conveyor

Systematic 56: CF-40T + LD-16 + Product Control Conveyor

Systematic 36
