

# Double Index Monoblock System

## Info :

The double-indexing Intrepid platform is a multi-station Monoblock system, designed to handle various filling, plugging, and capping/crimping applications. This advanced system ensures precision and efficiency, making it a reliable solution for complex packaging needs.

- Compact design limiting the number of operators
- Programmable servo-driven filling station (pump & bottom-up fill)
- Mechanical motions assisted with some servo-driven station
- Quick, repeatable changeover
- Touch-screen control
- Machine controlled with industrial P.L.C.
- Integrated Euroguard safety enclosure

\* Speed and performance criteria are subject to testing with actual samples.

\*\* BPM = Bottles Per Minute.

## Category :

Monoblock System

## Application :

Filling | Plugging | Capping | Crimping

## Speed :

Up to 120 BPM

## Optional Special Features:

Explosion Proof
