

Horizontal Ultra-High Speed Series

MODELS
Servoriginal

**The market fastest continuous
motion solution for flat pouch**

Mespack Cloud Servoriginal is 25% faster than any other HFFS. It is the gold standard workhorse, capable of three or four-sided seals for flat pouches.

Furthermore, the HFFS machine is able to process up to 7200 linear inches of film per minute (25.4 mm width). Automatic

web splicing is done at zero speed with no line cessations while servo motion controls, assures consistent pouch forming as the material moves onto the vertical sealer.

The possible applications are cocoa, spices, sweeteners, powdered cheeses, etc.
